Ministry of Higher Education and Scientific Research Scientific Supervision and Scientific Evaluation Apparatus Directorate of Quality Assurance and Academic Accreditation Accreditation Department

Academic Program and Course Description Guide

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision:</u> An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

<u>Program Mission:</u> Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

<u>Learning Outcomes</u>: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies</u>: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extracurricular activities to achieve the learning outcomes of the program.

Academic Program Description Form

University Name: University of Anbar Faculty/Institute: Faculty of Agriculture

Scientific Department: Department of Soil Sciences and Water Resources

Academic or Professional Program Name: Agricultural concept

Final Certificate Name: Bachelor's degree of Agriculture

Academic System: Course

Description Preparation Date: 25-1-2024

File Completion Date: 14-4-2024

Signature:

Head of Department Name:

Waqas Mahmood Abdel latif

Date:14-4-2024

Sauce Sauce

Scientific Associate Name: Osama Hussein Mahedi

Idham Ali Abed Khalaf Deamol the College of Agriculture

1. Program Vision

- Providing students with knowledge of the nature and function of agricultural methods from an academic and occupationally perspective
- Understanding the nature of agricultural work based on international, American and local statistical standards
- Learn the types of agriculture based on the specialty of the entity implementing the work
- Providing them with information regarding programs and files related to agricultural methods
- Developing their awareness regarding agriculture, its importance, types and stages of examination.
- Knowing the nature of Central Inspection Agency work and how to cooperate with them by obtaining accurate statistics

2. Program Mission

- Understand the nature of the work of agricultural concepts
- Distinguishing between types of agriculture and processing methods
- Distinguishing between three terms (land, marketing, and ultimate beneficiary)
- Knowing the types of population statistics that the statistical supervisor uses
- Focusing on the statistical report is used by the agricultural engineer,
 depending on the nature of the task assigned to him.
- Identifying the nature of the work and jurisdiction of private and public statistical agencies.

3. Program Objectives

Know how to design good programs

Know how to prepare results report

Knowing how to test the population survey system through its implementation stages

4. Program Accreditation

Studying plan for forth stage

5. Other external influences

Relevant laws and guidelines

| 6. Program Structure | | | | | | | | | | | |
|-----------------------------|-------------------|--------------|------------|-------------|--|--|--|--|--|--|--|
| Program Structure | Number of Courses | Credit hours | Percentage | Reviews* | | | | | | | |
| Institution Requirements | 5 | 9 | 7% | fundamental | | | | | | | |

| system through its implementation stages | |
| | |
| Ethics | |
| inculcate values and principles in the student | |

| by emphasizing the independency when |
|--------------------------------------|
| expressing his impartial opinion |

- Emphasizing personal traits such as integrity, honesty, confidentiality, and ethics.
- Explaining the importance of the rules of occupational conduct and exposure to legal penalties if violated
- Emphasizing the importance of combating financial and administrative corruption by regulatory bodies.

9. Teaching and Learning Strategies

- Adopting the method of delivering lectures and linking each topic with examples from the reality of agricultural work
- Giving them some simple practical exercises that are discussed by the students
 and solved during the lecture
- With the participation of all students in the section with the lecturer to give the material as a form of interaction.
- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- Summer training in agricultural and veterinary institutions

10. Evaluation methods

Students contribute in the lecture based on their prior preparation for the subject. Giving them an exercise as a homework assignment and asking them to solve it on separate papers, which will collect in the next lecture.

Giving students a case study and dividing them into groups to write a report about that study.

Evaluation through monthly examinations.

Professional Development

Mentoring new faculty members

Involving the new staff in teaching with the old professors in order to gain experience, skills, and a method of dealing with students

Professional development of faculty members

Encouraging students to achieve the highest marks in the stages of study in the college so that they can be the first in order to achieve their future dreams of completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

12. Acceptance Criterion

The student's average in the preparatory stage, taking into account the student's desire

13. The most important sources of information about the program

Methodological books and scientific (books, journals, periodicals and websites) specialized in the field of soil and water

14. Program Development Plan

Continuous improvement of the program through evaluation and assessment results, etc., in which the observations are used to formulate changes in order to achieve the highest grades in achieving the program's educational objectives and student outcomes.

1. Course Name:

Soil principles

2. Course Code:

ASW201

3. Semester / Year:

Semester 2023_ 2024

4. Description Preparation Date:

2024/1/25

5. Available Attendance Forms:

Attendance (theoretical + practical)

6. Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 3.5 units

Course administrator's name (mention all, if more than one name)

Name: Huthafia jaseem mohammd Email: ag.huthafia.Jaseem@uoanbar.edu.iq

8. Course Objectives

- 1. Identify the soil, which is the upper part of the eart 4. Learn about analysis methods
- 2. Understanding the mechanism of soil formation a development.
- Identify the physical, chemical, fertility and biologi characteristics of soil for each type of soil.
- each soil characteristic.
- 5. Use some laboratory equipm and field tools.

9. Teaching and Learning Strategies

Strategy

- 1. Traditional means of explanation and clarification.
- 2. Electronic means of explanation and clarification.
- 3. Field work.
- 4. Adopting student groups for field work to take measurements.
- 5. Use of surveying devices and equipment.
- 6. Show illustrative pictures of the devices and their accessories.

10. Course Structure

| Week | Hours | Required Learning | Unit or subject | Learning | Evaluation |
|-----------|-------|--------------------------------|--------------------|--|------------|
| | | Outcomes | name | method | method |

Email: ag.ali.hussein@uoanbar.edu.iq

8. Course Objectives

- Course Objectives | 1- Classification of soils to series level.
 - 2- Classifying the lands and diagnosing what is present in the governorate, while identifying the productive determinants of each land type.
 - 3- Evaluation of lands according to their suitability for irrigated agriculture.
 - 4- Modern administrative methods in the field of soil management according to the identified determinants in the study area.

9. Teaching and Learning Strategies

Strategy

Through theoretical lectures and the field aspect of training in the field of soil management and identifying the determinants of land management. In addition to preparing reports on the problems facing soils and how to deal with them and use them.

- 1. Understanding the principles of soil fertility a knowing the extent of the plant's need for various and its relationship to plant productivity.
- 2. The extent of the importance of plant nutrients, forms in which they are found, and the factors affect their readiness for the plant.
- 3. Assessing the fertility state of the soil and identifying symptoms of deficiency of various nutrients that app on the plant.
- 4. Knowing how much, when and h to add these nutrients and in w form (chemical or organic).
- 5. Calculating the economic feasibilities and cost of added fertilizers, all with raising awareness aboreducing the amount of the fertilizers added without affecting yield.
- 9. Teaching and Learning Strategies

Strategy

- 1. Traditional means of explanation and clarification.
- 2. Electronic means of explanation and clarification.
- 3. Field experiments.
- 4. Field visits to agricultural fields.
- 5. Adopting student groups to conduct separate field experiments.
- 6. Use of various laboratory devices and equipment.
- 7. Displaying illustrative pictures of the various manifestations of symptoms of element deficiency on plants.

| Week | Hours | Required Learning | Unit or subject | Learning | Evaluation |
|------|-------|-------------------|-----------------|----------|------------|
| | | Outcomes | name | method | method |

| The first | 5 | Definition of growth a factors affecting it methods used fertility evaluation. | - | A lecture w explanation and clarification | The exam |
|------------|---|--|---------------------------------|--|----------|
| the second | | The foundations of sand plant relationships soil fertility, a biological readiness the methods used fertility evaluation | | A lecture w explanation and clarification | The exam |
| the third | | The foundations of sand plant relationships soil fertility, a biological readiness the methods used fertility evaluation | • | A lecture w explanation and clarification | The exam |
| the fourth | | The necessary eleme for plant growth a their classification + foundations that rely them: implementing field experiment potting experiment evaluate soil fertility | fertilizers | A lecture w explanation and clarification | The exam |
| Fifth | | Nitrogen + Estimat the ready quantities of number of macro a micro nutrients | fertilizers | A lecture w explanation and clarification | The exam |
| VI | | First month exam - the | oretical and practic | cal | |
| Seventh | | Phosphorus Estimating the read quantities of a number of macro and minutrients | Soil fertility a fertilizers | A lecture w explanation and clarification | The exam |
| VIII | | Potassium Estimating the readurantities of a number of macro and minutrients | | A lecture w explanation and clarification | |
| Ninth | | Calcium, magnesium and sulfur + estimate the ready quantities of number of macromicro-nutrients, | | A lecture w explanation and clarification | The exam |

23. Course Name:

Irrigation systems technologies

24. Course Code:

ASW408

25. Semester / Year:

the first 2023_2024

26. Description Preparation Date:

2024/1/25

27. Available Attendance Forms:

Attendance (theoretical + practical)

28. Number of Credit Hours (Total) / Number of Units (Total)

65 hours / 3.5 units

29. Course administrator's name (mention all, if more than one name)

Name: Wathib S S Alnuaymy

Email: ag.wathib.shukri@uoanbar.edu.iq

30. Course Objectives

- 1- It aims to teach students calculations and dealing with different irrigation systems
- 2- Acquiring the necessary skills in dealing with irrigation systems. 3-Identifying the problems, solutions, and available alternatives
 - 31. Teaching and Learning Strategies
- **1- Identify the mathematical** equations related to irrigation systems
- 2- Methods of calculating irrigation quantities
- 3- Identify the types of systems and deal with them
- 4- Identify suitability and adaptati

Skills objectives of the programme

- 1 Practical lessons
- 2- Field practices
- **3 Identify the types of irrigation systems and costs of installing them**

1. Course Name:

Engineering Drawing

2. Course Code:

3. Semester / Year: semester

2023_2024

4. Description Preparation Date:

2024/1/25

5. Available Attendance Forms:

Attendance

6. Number of Credit Hours (Total) / Number of Units (Total)

7. Course administrator's name (mention all, if more than one name)

Name: Marwa Yass Khudair

Email: ag.marwa.yass@uoanbar.edu.iq

8. Course Objectives

Basic Understanding: Introducing students to the fundame concepts of geometric drawing, including symbols, dimensions, scales. Analysis and Interpretation: Empowering students to anal and interpret geometric drawings and diagrams efficiently. Techn Skills Development: Enhancing students' skills in using geomedrawing tools such as traditional tools like ruler and compass.

9. Teaching and Learning Strategies

Strategy

Interactive Teaching: Using classroom discussions and workshops to enhance interaction an students and exchange of ideas. This helps deepen students' understanding of geometric draw concepts and their applications.

Flipped Classroom: Students review theoretical content outside the classroom, while class tim allocated for practical applications.

Cooperative Learning: Encouraging students to work in groups to promote collaboration knowledge exchange, leading to improved communication and teamwork skills.

Utilization of Diverse Resources: Providing a wide range of educational resources, incluinstructional videos, e-books, and scientific articles, to enhance understanding and explanowledge.

8. Course Objectives

Studying the sources of organic matter in the soil, transformations, and their impact on the soil and plants

9. Teaching and Learning Strategies

Strategy

It highlights the importance of organic matter and organic fertilizers and their effect on soil characteristics and considers them a good alternative to chemical fertilizers for a clean environment..

| Week | Hours | Required Learning | Unit or subject | Learning | Evaluation |
|------------|-------|--|-----------------|--|------------|
| | | Outcomes | name | method | method |
| The first | 5 | The history and introduction of organic matter and some of its important definitions | Organic matter | A lecture with explanation and clarification | The exam |
| the second | | Sources of organic matter in soil | Organic matter | A lecture with explanation and clarification | The exam |
| the third | | Components of plant waste | Organic matter | A lecture with explanation and clarification | The exam |

| the fourth | | Organic matter | A lecture | The exam |
|-----------------------|--|-----------------------|----------------------|----------|
| | | | with | |
| | Monthly exam | | explanation | |
| | | | and clarification | |
| Fifth | | Organic matter | A lecture | The exam |
| THEI | Decomposition of organic | Organio matter | with | |
| | compounds and formation of | | explanation | |
| | | | and | |
| | | | clarification | |
| VI | First mont | h exam - theoretical | | |

1. Course Name:

Human rights and public democracy

2. Course Code:

DEHR105

3. Semester / Year:

SEMESTER 2023 2024

4. Description Preparation Date:

25/1/2024

5. Available Attendance Forms:

Presence

6. Number of Credit Hours (Total) / Number of Units (Total)

30 hours 2 units per week

7. Course administrator's name (mention all, if more than one name)

Name: abd al salam khalaf

Email: abd.khalaf@uoanbar.edu.iq

8. Course Objectives

- 1- Preparing students who believe in human rights and democracy
- 2- Instilling national values in the individual objectively
- 3- Helping in writing scientific research

- and society and combating forms of corrupti 4- Knowledge of the general rights and freedoms of the individual and society
 - 1- Practical application of public rights and freedom
 - 9. Teaching and Learning Strategies

Strateg 1- Enabling students to obtain the intellectual framework

A believer in the strategy of human rights and public freedoms

- 2- Preparing a generation that is conscious and aware of the importance of rights and freedoms
- 3- Instilling the principles of patriotism and preserving it
- 4- Developing a culture of human rights and democracy among the individual and society
- 1- Developing students' cognitive awareness of the importance of human rights And democracy
- 10. Course Structure

1. Course Name:

Soil Minerals

2. Course Code:

ASW311

- 3. Semester / Year: **Second semester 2024**
- 4. Description Preparation Date:

2024-1-25

5. Available Attendance Forms:

Weekly

6. Number of Credit Hours (65) Number of Units (3)

- 7. Course administrator's name (Dr.Ahmed Riyadh Abdulateef)
- 8. Course Objectives

Course Objectives

- A. The student should understand the importance of soil clay minerals and the types of clay in which chemical phenomena occur.
- B. The student should distinguish between Clay colloids in the soil in which chemical processes take place.
- C. The student should know the main characteristics of clay minerals is different soils.
- D. How to work on the analysis of clay minerals and by methods adop in international laboratories.

9. Teaching and Learning Strategies

Strategy

The ability to use certain devices and equipment for metallographic analysis. The ability to diagnose different clay minerals depending on different analysis methods.

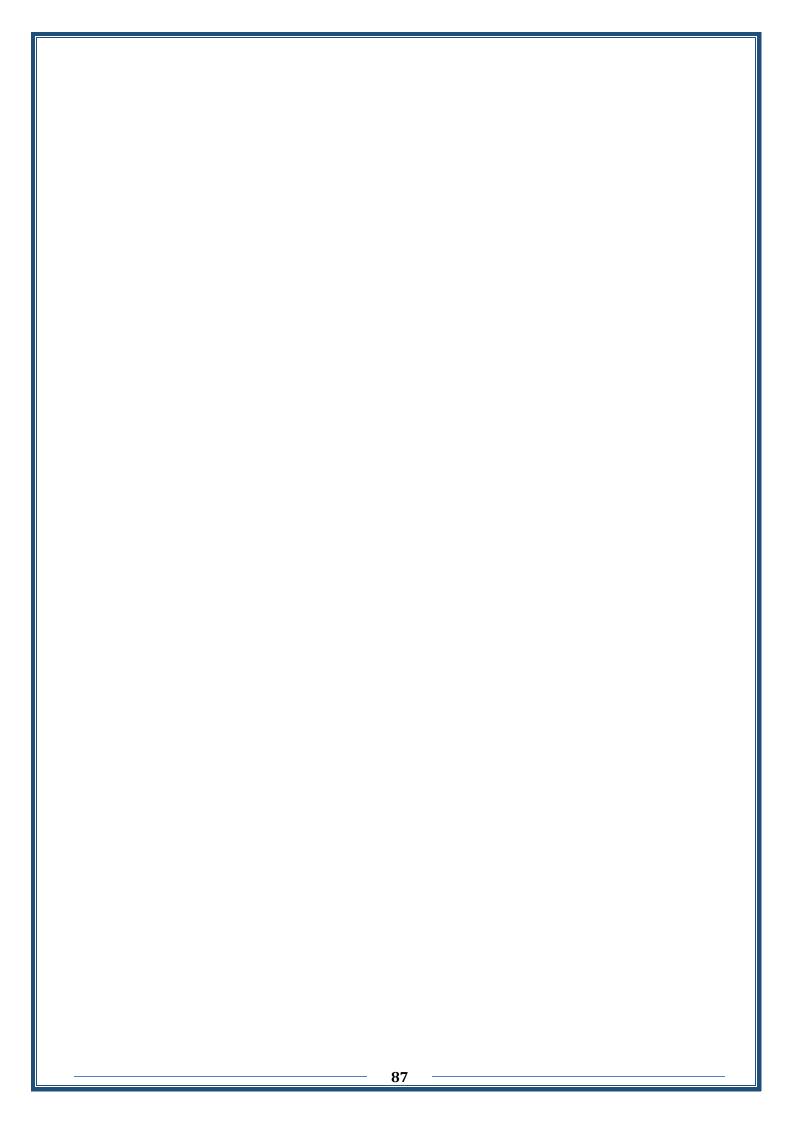

The ability to apply the results of chemical analysis in understanding their mineral components..

The ability to distinguish chemical properties from the knowledge of the types of clay minerals contained in them.

The ability to measure the types of clay minerals through the use of metallurgical and chemical methods of analysis.

75 / 5

7. Course administrator's name (mention all, if more than one name)

Name: Prof. Dr. Zeyad Abdul-Jabar Abdul-Hamed Email: ag.zeyad.abdul-hamed@uoanbar.edu.ig

Course Objectives:

8.

The student learns about the scientific foundations for designing analyzing theoretical and practical experiments

Learn about modern technologies relevant to designing experiments

9. Teaching and Learning Strategies

Strategy

- A Expanding the student's theoretical and practical understandings
- **B** Access to recent and critical experiments related to experimental design C-Learn about methods for designing experiments, processes, and conditions surrounding the research or experiment

| Week | Hours | Required Learning | Unit or subject | Learning | Evaluation |
|------|---|--|---|-----------------------------|---------------------------------|
| | | Outcomes | name | method | method |
| 1 | (30 hours theoretical + 45 practical) (75 hours 5 hours (2 + 3) | Look and work Explanation and interpretation with Use means Electronic clarification | Introduction to the histo of statistics, the first researchers in designing experiments, studying statistical tests | practical | Theoretical and practical tests |
| 2 | 5 | Look and work Explanation and interpretation with Use means Electronic clarification | An introduction to the history of statistics, the first researchers in statistics and experimental design, | heoretical and practical | Theoretical and practical tests |

| 3 | 5 | Look and work Explanation and interpretation with Use means Electronic clarification | The importance designing experiments the researcher | theoretical and practical | Theoretical and practical tests |

| 12 | 5 | Look and work Explanation and interpretation with Use means Electronic clarification | latin square design | theoretical and practical | Theoretical and practical tests |
|----|---|--|--|---------------------------|---------------------------------|
| 13 | 5 | Look and work Explanation and interpretation with Use means Electronic clarification | split experiences | theoretical and practical | Theoretical and practical tests |
| 14 | 5 | Look and work Explanation and interpretation with Use means Electronic clarification | Split plot experiments exercises | theoretical and practical | Theoretical and practical tests |
| 15 | 5 | Look and work Explanation and interpretation with Use means Electronic clarification | Orthogonal comparisons experiments and trend analysis | theoretical and practical | Theoretical and practical tests |

- 1-Weekly tests (quiz) and semester and final exams (theoretical and practical).
- 2- Interaction within the lecture.
- 3- Attendance.
- 4- Commitment and discipline within the classroom and laboratory.
- 5- Preparing scientific reports, providing scientific explanations and presenting them
- 6-Expanding the student's theoretical and practical understandings
- 7- Learn about modern techniques relevant to Design of experiments
- 8- Identify the surrounding factors related to the science of Design of experiments
- 9-Learn about Design of experiments and field planning operations.

8. Course Objectives

Course Objectives

The ability to understand the theories and phys laws, and using it in different applications, ability to understand the physical principles, working with them according to the theories laws, The students must know the relation with these physical laws, and are using them practical The ability the analysis the problems which he faced him, and solve it..

9. Teaching and Learning Strategies

Strategy

- A1. Analysis the problems and understand how can you be ability to solve it.
- A2. Testing these physical laws in the practical experimental.
- A3. Using physical equations to find variables in the problems.
- A4. Ability of student to evaluate the problems, and writing the scientific reports.
- A5. The student can acquire the practical and scientific experience in his specialized f it.

| Week | Hours | Required | Unit or subject | Learning | Evaluation |
|--------|-------|-------------------------------------|---|---|--|
| | | Learning | name | method | method |
| | | Outcomes | | | |
| First | 2 | General properties for matter | General Introduction | Theoretical Lectures, white board | questions, discussions, and examples |
| Second | 2 | Physical quantities and their units | Finding gravity acceleration by using simple pendulum | on the white bo | questions, discussions, and examples |

| Third | 2 | Temperature measurements | Finding force constant for spiral spring | on the white board, Homewo | questions, discussions, and examples |
|------------|---|--|--|---|--|
| Fourth | 2 | Dimensions , velocities and molecular forces | Finding Young's modulus when the mass is constant | on the white bo | questions, discussions, and examples |
| Fifth | 2 | | Exam of | first month | |
| Sixth | 2 | Mechanical properties for constant fluid | Review | on the white bo | questions, discussions, and examples |
| Seventh | 2 | Elastic coefficients | Finding unknown resistance by using resistance box | on the white bo | questions, discussions, and examples |
| Eighth | 2 | Surface tension and capillary properties | Ohms' law investigation | on the white bo | questions, discussions, and examples |
| Ninth | 2 | Finding Young's modulus when the length is constant | Mechanical properties for flow fluid | on the white bo | questions, discussions, and examples |
| Tenth | 2 | | Exam of s | econd month | |
| Eleventh | 2 | Viscosity | Review | on the white bo | questions, discussions, and examples |
| Twelfth | 2 | Methods of finding viscosities | Finding liquid density using test tube | on the white bo | questions, discussions, and examples |
| Thirteenth | 2 | Osmotic phenomenon | Effect the temperature on the viscosity of liquid | on the wl board, Homewo | 1 / |
| Fourteenth | 2 | Finding viscosity coefficient for liquid using falling sphere through viscosity liquid | capillary properties and their applications | on the wl board, Homewo and Application by computers | discussions, |
| | | Exam of the third month | | | |

Theory exam 30%, Practical Quiz 10%, Practical exam 10%, final exam 50%. Final degree from 100%.

1. Course Name:

Soil morphology

2. Course Code:

ASW309

- 3. Semester / Year: Year: Second Semester/2024
 - 4. Description Preparation Date:

25 / 1 / 2024

5. Available Attendance Forms:

Weekly

6. Number of Credit Hours / Number of Units

45 / 3

7. Course administrator's name (mention all, if more than one name): Prof Dr.Salah Murshid Farhan

8. Course Objectives

Course Objectives

Knowledge of soil properties, pedological information, and standard morphological description

9. Teaching and Learning Strategies

Strategy theoretical explanation with practical field application

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|--|--|--|------------------------|
| 1 | 5 | Giving a basic id about morphological phenomena | Definition of morpholo and its relationships | Scientific theoretical explanation | Group participation |
| 2 | 5 | Giving a basic idea about morphological phenomena | Vocabulary for morphological description | Scientific theoretical explanation | Group participation |
| 3 | 5 | Giving a basic idea about morphological phenomena | Conditions for eligibili for morphological performance | Scientific theoretical explanation | Group participation |
| 4 | 5 | Giving a basic idea about morphological phenomena | Morphological characterization technology | Scientific theoretical explanation | Group participation |

8. Course Objectives

Course Objectives

The ability to understand the theories and phys laws, and using it in different applications, ability to understand the physical principles, working with them according to the theories laws, The students must know the relation with these physical laws, and are using them practical the ability the analysis the problems which he faced him, and solve it...

9. Teaching and Learning Strategies

Strategy

- A1. Analysis the problems and understand how can you be ability to solve it.
- A2. Testing these physical laws in the practical experimental.
- A3. Using physical equations to find variables in the problems.
- A4. Ability of student to evaluate the problems, and writing the scientific reports.
- A5. The student can acquire the practical and scientific experience in his specialized f

| Week | Hours | Required | Unit or subject | Learning | Evaluation |
|--------|-------|-------------------------------------|---|---|--|
| | | Learning | name | method | method |
| | | Outcomes | | | |
| First | 2 | General properties for matter | General Introduction | Theoretical Lectures, white board | questions, discussions, and examples |
| Second | 2 | Physical quantities and their units | Finding gravity acceleration by using simple pendulum | on the white bo | questions, discussions, |

| | | | | | and examples | | |
|------------|---|--|--|---|--|--|--|
| Third | 2 | Temperature measurements | Finding force constant for spiral spring | on the white board, Homewo | questions, discussions, and examples | | |
| Fourth | 2 | Dimensions , velocities and molecular forces | Finding Young's modulus when the mass is constant | on the white bo | questions, discussions, and examples | | |
| Fifth | 2 | Exam of first month | | | | | |
| Sixth | 2 | Mechanical properties for constant fluid | Review | on the white bo | questions, discussions, and examples | | |
| Seventh | 2 | Elastic coefficients | Finding unknown resistance by using resistance box | on the white bo | questions, discussions, and examples | | |
| Eighth | 2 | Surface tension and capillary properties | Ohms' law investigation | on the white bo | questions, discussions, and examples | | |
| Ninth | 2 | Finding Young's modulus when the length is constant | Mechanical properties for flow fluid | on the white bo | questions, discussions, and examples | | |
| Tenth | 2 | Exam of second month | | | | | |
| Eleventh | 2 | Viscosity | Review | on the white bo | discussions, and examples | | |
| Twelfth | 2 | Methods of finding viscosities | Finding liquid density using test tube | on the white bo | questions, discussions, and examples | | |
| Thirteenth | 2 | Osmotic phenomenon | Effect the temperature on the viscosity of liquid | on the wl | 1 / | | |
| Fourteenth | 2 | Finding viscosity coefficient for liquid using falling sphere through viscosity liquid | capillary properties and their applications | on the wl board, Homewo and Application by computers | discussions, | | |
| | | Exam of the third month | | | | | |
| | | | | | | | |

Theory exam 30%, Practical Quiz 10%, Practical exam 10%, final exam 50%. Final degree from 100%.

| Course Objectives Giving a historical overview, definition, and importance of studying microbiology. Definition of microbiology: characteristics of microorganisms, microscopy bacteria, viruses, rickettsiae, metabolism in microorganisms, genetics of microorganisms, control of galactic organisms, the relationship of microorganisms to diseases, applied microbiology, - Introducing students to the types of microorganisms - The student knows how to name microorganisms. Study of the microscope, its parts, the magnification power of the microscope, and the relationships between living things | | | | microscopy, enetics of o of | | | | | | | |
| 9. Tea | ching and | d Learning | g Strategi | es | | | | | | | |
| Strategy 1- Brainstorming 2- Thinking strategy according to the student's ability (for example) if the student can learn the concept of the existence of microorganisms and distinguish The beneficial from the harmful. 3- Critical thinking strategy in learning, which is a term that symbolizes the highest levels of thinking that aims to pose a problem. Then analyze it logically to reach the desired solution. | | | | | | | | | | | |
| 11. Course Structure | | | | | | | | | | | |
| Week | Hours | ILOs | | Unit/Module orTopic Title | TeachingMethod | Assessment Method | | | | | |

| First | 5 | The student gets to | Soil Microbiology | Lecture, explanation and | the evam |
|------------|---|--|-------------------|---|----------|
| FIISU | 3 | know the importance of studying microbiology. | Son Microbiology | presentation of models | the exam |
| Second | 5 The student learns about the sections of microbiology | | Soil Microbiology | Lecture, explanation and presentation of models | the exam |
| Third | 5 | The student gets to know the groups of neighborhoods microscopic soil | Soil Microbiology | Lecture, explanation and presentation of models | the exam |
| Fourth | 5 | The student learns about the organic matter, the carbon cycle, and the enzymatic activity in the soil. | Soil Microbiology | Lecture, explanation and presentation of models | the exam |
| Fifth | 5 | The student learns about naming living things | Microbiology | Lecture, explanation and presentation of models | the exam |
| Sixth | 5 | Microscopic | Microbiology | Lecture, explanation and presentation of models | the exam |
| seventh | 5 | The student learns about the characteristics of microorganisms | Microbiology | Lecture, explanation and presentation of models | the exam |
| Eighth | 5 | The student learns about the microscope and its parts | Microbiology | Lecture, explanation and presentation of models | the exam |
| Ninth | 5 | The student learns about bacteria, their shapes, and their methods of reproduction | Microbiology | Lecture, explanation and presentation of models | the exam |
| Tenth | 5 | The student learns about bacteria, their shapes, and their methods of reproduction | Microbiology | Lecture, explanation and presentation of models | the exam |
| eleventh | 5 | The student learns about the anatomy of bacteria | Microbiology | Lecture, explanation and presentation of models | the exam |
| twelfth | 5 | The student learns about the development of bacteria and their methods of reproduction | l Microbiology | Lecture, explanation and presentation of models | the exam |
| Thirteenth | 5 | The student learns about the nutrition of living things microscopic, multiplying. | | Lecture, explanation and presentation of models | the exam |
| fourteenth | 5 | The student learns ways to isolate Some microorganisms | | Lecture, explanation and presentation of models | the exam |

| | ı | | 1 | | | | |
|---|--------------|--|--|--|---|---------------------------------|--|
| | | | | | | | |
| fifteenth | 5 | The student will identify ways to isolate other microorganisms | | | Lecture, explanation and presentation of models | the exam | |
| 10. Course Evaluation | | | | | | | |
| Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc | | | | | | | |

1. Course Name:

English Language/4

2. Course Code:

ENGL406

3. Semester / Year:

SECOND / 2023-2024

4. Description Preparation Date:

25/1/2024

5. Available Attendance Forms:

in-person learning

6. Number of Credit Hours (Total) /

Number of Units (Total) 75 HOUER/2 UNIT

7. Course administrator's name (mention all, if more than one name)

Name: Lecturer: Muhammed Rasheed Muhammed Email:ag.muhammed.rasheed@uoanbar.edu.iq

- 8. Course Objectives English Language/4
- a. Daily and monthly tests through questions on the subject of the subject
- b. Grades on students' participation in research and scientific reports
- c. Discussing research and reports, presenting them, and giving them a grade
- d. Conducting tests during the application period and asking questions to students to determine the extent of their understanding of the subject
- e. Conduct a discussion of reports at the end of the semester to find out students' choices in courses
- f. Writing reports after completing the application period to determine the extent which students were able to diagnose problems and how to find solutions

9. Teaching and Learning Strategies

- a. Developing teaching programs in coordination with higher department
- b. Develop teaching curricula similar to the work environment.
- c. Sending students to departments and directorates for the purpose of conducting summer application.
- d. Assigning students to conduct research and reports.
- e. Assigning students to go to the library and collect resources on the topi
- f. Implementing practical lessons in laboratories, each according to specialty

10. Course Structure

| | | Outcomes | | method | method |
|----|--------------------|-----------|--|--------------------|-----------------------------------|
