Ministry of Higher Education and Scientific Research Scientific Supervision and Scientific Evaluation Apparatus Directorate of Quality Assurance and Academic Accreditation Accreditation Department

Academic Program and Course Description Guide(Department of Horticulture and Landscape Gardening

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision:</u> An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

<u>Program Mission:</u> Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies</u>: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extracurricular activities to achieve the learning outcomes of the program.

Academic Program Description Form

University Name: University of Anbar Faculty/Institute: College of Agriculture

Scientific Department: Horticulture and land scope gardening

Academic or Professional Program Name: Courses (Autumn course and spring course)

Final Certificate Name: BSc in Agricultural sciences

Academic System: By Semester

Description Preparation Date: 25/01/2024

File Completion Date: 14/04/2024

Signature:

Head of Department Name:

Prof. Dr. Shamil I. Neamah

/deham Ali Abed Khalaf Dean of the College of Agriculture

1. Program Vision

Preparing scientifically qualified cadres and opening up to society to transfer modern agricultural technologies and keep pace with global development in the agricultural sector.

2. Program Mission

The main goal of the department's administration is to provide society with resources and staff working in various educational and pedagogical fields, as well as the industrial, banking, security, and economic sectors through:

- 1- Two agricultural engineer teachers graduated with high-level qualifications capable of modernizing the infrastructure in the field of agriculture.
- 2- Developing students, providing them with modern technologies, and providing services to the community and the labor market.
- 3- Building leadership qualities in graduates by training them to work as one team.
- 4- Support and provide a good work environment for students and faculty members.
- 5 Caring for, supporting and encouraging outstanding students.

3. Program Objectives

- 1. Preparing graduates with high theoretical and practical skills to meet the needs of industry, technological development and community service in the field of agricultural engineering.
- 2. Providing the graduates with the applied practical skills and the necessary engineering background according to the scientific developments taking place in the methodological vocabulary and modern teaching methods to pursue postgraduate studies in the various specializations of agricultural engineering.

7.Program Description

3. Preparing graduates to participate actively in building and rebuilding the country and achieving economic and social benefits for society.

4. Program Accreditation

Does the program have program accreditation? And from which agency?

5. Other external influences

Is there a sponsor for the program?

8. Expected learning outcomes of the program

Knowledge:

- 1. The graduate will have the ability to identify and formulate horticultural problems through familiarization with the basic principles of agricultural sciences such as plant and soil sciences, mathematical sciences, engineering planning, staff management, scheduling, and monitoring to ensure successful project implementation.
- 2. The graduate possesses knowledge of various irrigation systems and techniques used to save water so that he can design, implement, and control appropriate irrigation systems to ensure sustainable use of water resources.
- 3. The graduate possesses knowledge of different types of plants, their requirements, and methods of cultivation and maintenance. He can identify plants suitable for specific conditions such as soil, climate, and lighting and can carry out the planting and care operations necessary to promote plant growth and development.
- 4. The graduate can provide agricultural consultations to institutions and governmental bodies, evaluate surrounding conditions, make recommendations regarding the organization, cultivation, and improvement of plants, and solve problems related to plants, soil, and resource management.
- 5. The graduate can conduct scientific research in the field of horticulture and garden engineering, develop and improve agricultural technologies, and come up with innovative solutions to the problems facing the agricultural sector.
- 6. The graduate can manage horticultural projects, including planning resources, managing time and budget, dealing with teams, and coordinating operations.

Skills:

- 1. The graduate will have extensive knowledge in plant sciences, including methods of plant cultivation, their water, pedagogical and environmental requirements, and control of plant pests and diseases.
- 2. The graduate will have skills in designing and planning gardens and coordinating the various elements in the green space, including plants, paths, water bodies, and architectural elements.
- 3. The graduate will be able to manage horticultural projects, including planning resources, managing time and budget, dealing with teams, and coordinating the process.
- 4. The graduate will have a good understanding of the technology used in the field of horticulture and landscaping, including advanced irrigation systems, agricultural tools and equipment, and modern techniques in agriculture such as hydroponics and vertical farming.
- 5. The graduate will have good communication skills to interact with clients and project workers and provide instructions and recommendations clearly and effectively.

- 6. The graduate will be familiar with professional standards and practices in horticulture and landscape architecture and must be able to act ethically and responsibly.
- 7. The graduate will be able to analyze problems related to orchards, vegetable and ornamental plants, as well as gardens and green spaces, and develop practical and innovative solutions.
- 8. The graduate can also seek continuous development and acquire new skills by participating in training courses and workshops related to the field of horticulture and garden engineering.

Ethics:

Preparing engineering designs for agricultural parts and systems.

Analyzing and discussing the results of engineering tests for use in design and evaluation processes.

The ability to write and draft engineering technical reports on the results of scientific examinations and tests.

The ability to extract test results and their effects from the test.

9. Teaching and Learning Strategies:

- 1. Preparing presentations that explain the basic concepts in the field of horticulture and providing detailed lectures on various topics. Use pictures and illustrations to illustrate ideas and concepts better.
- 2. Organize interactive sessions and workshops that allow participants to participate in the learning process actively. Practical models for growing vegetable plants orchids or designing and landscaping gardens are presented, and participants are encouraged to participate and apply them in practice.
- 3. Organize field trips to local parks, gardens, nurseries, and farms. Could you explain how to care for and maintain it.
- 4. Using multimedia, mobile applications, and educational programs to provide information and interact with students.
- 5. Urging students to participate in practical projects that require the service and care of fruit trees, vegetables, and ornamental plants and guiding and assisting them in choosing appropriate plants, planning the space, and caring for the plants. This enhances practical learning and gives them an opportunity to apply the concepts they have learned.

10.Evaluation methods:

- Theoretical semester exams: 20%, practical semester exams (laboratory, field, paper): 20%, theoretical daily exams: 10%
- Final practical test (laboratory, field, paper): 20%, final theoretical test: 30%

Professional Development

Mentoring new faculty members

- 1. The department's scientific committee guides new faculty members through:
- 2. Clarify the vision, mission, and goals that the educational institution seeks to achieve, as well as the policies and standards to which they must adhere.
- 3. Determine the educational objectives for each course and explain to them the preferred teaching methods and the appropriate methodology to achieve these objectives.
- 4. Encourage new faculty members to build strong and productive relationships with students. They must be available for students' academic inquiries and needs and assist them in achieving their educational goals.
- 5. Providing them with support in the field of scientific research and encouraging them to participate in conferences and publishing research in prestigious scientific journals, as well as guiding them in choosing research topics and providing assistance in conducting research and analyzing data.
- 6. Providing them with opportunities for continuing professional development, whether through internal or external workshops, training programs, or educational courses that encourage them to continue their learning and develop their teaching and research skills.

Professional development of faculty members

The Department's Scientific Committee, under the direct guidance of the Department Head and the College Dean, has a plan to develop the college through:

- 1. Paying attention to scientific communication with students, colleagues, and the academic community by organizing lectures, seminars, and workshops and participating in academic events to exchange knowledge and experiences.
- 2. Promoting professional development through communication and cooperation with local and international companies and research institutions by organizing field visits, exchanging experiences, and cooperating in research and applied projects.
- 3. Holding annual conferences in cooperation with Iraqi and Arab universities and research institutions with the participation of all faculty members (2021-2022) and (2022-2023).
- 4. Contributing to conferences in various universities inside and outside Iraq.

- 5. Contributing to publishing research in local, regional, and international journals (Scopus and Clarivate).
- 6. Participation in various committees at the university and the ministry.

12. Acceptance Criterion

Central registration is usually carried out by the Ministry of Higher Education based on the degree, professional field, location and university requirements.

13. The most important sources of information about the program

The program initiative came as a result of scientific and technological development in the agricultural field and research on sustainable agriculture and climate change. Through cooperation with universities and research centers, reviewing the reports of the Food and Agriculture Organization of the United Nations, and reviewing modern scientific periodicals and magazines that specialize in the fields of agriculture and agricultural sciences, the need emerged to prepare an academic program. Therefore, the program information is mainly derived from international programs, and the idea of the academic program in Iraq came from the need to develop an educational system that contributes to the qualification and training of Iraqi cadres in various fields and thus keeps pace with development and education in international universities.

14. Program Development Plan

Agricultural technologies are constantly evolving with technological progress in the agricultural field. Here, it was necessary to keep pace with this development, so the need arose to update the curriculum according to the requirements of the labor market by specifying some indicators. These indicators include graduation rates, student evaluations, student performance in tests or final evaluations, Developing essential skills, student participation in academic and community activities, and other relevant factors, or through the use of questionnaires, opinion polls, performance tests, and student evaluations, as well as comparing data between different periods, or between different groups of students, and thus conducting periodic evaluations to examine progress. The program and these evaluations are quarterly or annual.

Course Description Form(The First Stage)

Course Description Form

1. Course Name:

Principles of the food industry

2. Course Code:

AH1910

3. Semester / Year:

2023-2024

4. Description Preparation Date:

25/1/2024

5. Available Attendance Forms:

Mandatory

6. Number of Credit Hours (Total) / Number of Units (Total):

75 h.

7. Course administrator's name (mention all, if more than one name)

Name: Dr. Fadwa Waleed Abdulqahar and Dr. Sari Ali Hussein Email: ag.fadwa.waleed@uoanbar.edu.iq

8. Course Objectives

Course Objectives

The Fundamentals of Food Manufacturing course aims to enrich students' knowledge of the following:

- 1- The science of food processing and its objectives
- 2- How to establish food factories, the factors that must be provided for this purpose, and the obstacles that stand in the way of achieving the development of food industries in Iraq.
- 3- Causes of food spoilage and various manifestations of spoilage.
- 4- The various means of preserving food and the various manufacturing processes that are performed on food and how to implement them in food factories in a scientific and sequential manner for the purpose of preserving food and manufacturing various products, such as canning, cooling, freezing, drying, pickling, and preserving with high salt and sugar concentrations and food additives.
- 5- Manufacturing specific food products such as jams, juices, vinegar, pickles, tomato products, molasses, burgers, and samoon.
- 6- Different packaging materials, their advantages, disadvantages, and uses.

9. Teaching and Learning Strategies

Strategy

1. Developing teaching programs in coordination with higher departments.

- 2. Developing teaching curricula similar to the work environment.
- 3. Sending students to departments and directorates for the purpose of conducting summer school.
- 4. Assigning students to conduct research and reports related to the course.
- 5. Assigning students to use of libraries and websites to collect sources on course topics.

L		I			

11.Course Evaluation

1- Conducting tests during the semester and asking questions to students to

determine their understanding of the subject.

- 2- Conduct a research discussion at the end of the semester to find out students' choices in courses.
- 3- Conduct extracurricular activity by writing reports or educational brochures after completing the semester period to determine the extent to which students are able to diagnose problems and how to find solutions.

12.Learning and Teaching Resources					
Required textbooks (curricular books,	Hassan, Abdul Ali Mahdi and Al-				
any)	Hakim, Sadiq Hassan. 1985.				
	Fundamentals of Food Manufacturing.

Course Description Form

13. Course Name:

Agricultural machinery and equipment

14. Course Code:

AH1911

15. Semester / Year:

Semester 2023-2024

16. Description Preparation Date:

25/1/2024

17. Available Attendance Forms:

By attendance

18. Number of Credit Hours (Total) / Number of Units (Total)

5/3

19. Course administrator's name (mention all, if more than one name)

Name: Dr. Ghazwan Husam Tawfeeg

Email: ag.ghazwan.hussam@uoanbar.edu.iq

20. Course Objectives

Identifying the design and application engineering fundamentals of agriculturactors, which enables students of the Department of Horticulture to deal with the unand working methods of machines found in orchids and agricultural fields.

21. Teaching and Learning Strategies

- 1. To learn about the basic principles of repair and maintenance of engines and means power transmission.
- 2. To learn about the basic principles of agricultural equipment and maintenance method
- To learn about the engineering basics of machines, the development of th manufacture, and methods of dealing with these devices and equipment.

4. Course Structure

Week	hrs./week	Subject	Education output	Education method	Assessment method
1	Theoretical part (3hrs) Practical part (2hrs)	Details and definition of tractors and farm work	Identify topics	Curriculum + assignment + video + data presentation + practical	Class discussion and daily exam

2	Theoretical	Classification of tractors	Types of	Curriculum +	Class
	part (3hrs)	according to	agricultural	assignment +	discussion
	Practical part	manufacturing and	tractors	video + data	and daily
	(2hrs)	design concepts		presentation +	exam
	,			practical	
3	Theoretical	Definition and	Main tractor	Curriculum +	Class
	part (3hrs)	explanation of the	parts	assignment +	discussion
	Practical part	components of the		video + data	and daily
	(2hrs)	agricultural tractor		presentation +	exam
				practical	
4	Theoretical	Engine classification,	Engines and	Curriculum +	Class
	part (3hrs)	definition, and	their types	assignment +	discussion
	Practical part	explanation of its		video + data	and daily
	(2hrs)	components		presentation +	exam
				practical	
5	Theoretical	The method of ignition	Cycle of	Curriculum +	Class
	part (3hrs)	of fuel types and their	movement of	assignment +	discussion
	Practical part	effect on the	pistons in an	video + data	and daily
	(2hrs)	performance of each	engine	presentation +	exam
	-1 1	type		practical	O.
6	Theoretical	Benefits of oil and	Engine	Curriculum +	Class
	part (3hrs)	components of the	lubrication	assignment +	discussion
	Practical part	system.	device + Engine	video + data	and daily
	(2hrs)	Types of engine cooling,	cooling system	presentation +	exam
		their parts and operation		practical	
7	Theoretical	The hydraulic system of	installation and	Curriculum +	Class
	part (3hrs)	the tractor + Power	operation of	assignment +	discussion
	Practical part	take-off shaft	the system	video + data	and daily
	(2hrs)		,	presentation +	exam
				practical	
8	Theoretical	First monthly exam	First monthly		
	part (3hrs)		exam		
	Practical part				
	(2hrs)				
9	Theoretical	Moldboard plough +	Installation and	Curriculum +	Class
	part (3hrs)	Disc plow and rotary	operation of	assignment +	discussion
	Practical part	disc	the plough	video + data	and daily
	(2hrs)			presentation +	exam
				practical	
10	Theoretical	Types of mechanical	Machine	Curriculum +	Class
	part (3hrs)	seeders and their work	installation and	assignment +	discussion
	Practical part		work	video + data	and daily
	(2hrs)			presentation +	exam
11	Thogratical	Coodlings and plantage	Its types and	practical	Class
11	Theoretical	Seedlings and planters	Its types and	Curriculum +	Class
	part (3hrs)		work	assignment +	discussion
	Practical part			video + data	and daily
	(2hrs)			presentation +	exam
				practical	

12	Theoretical part (3hrs) Practical part (2hrs)	Tree shaker + potato puller + palm service equipment	Installation works for every machine	Curriculum + assignment + video + data presentation + practical	Class discussion and daily exam
13	Theoretical part (3hrs) Practical part (2hrs)	Use of the positioning system and methods of using it in agricultural tractors.	Smart and advanced devices to treat crops	Curriculum + assignment + video + data presentation + practical	Class discussion and daily exam
14	Theoretical part (3hrs) Practical part (2hrs)	Second monthly exam	Second monthly exam		

5. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

6. Learning and Teaching Resources

Required textbooks (curricular books, if any)	 Agricultural tractors and the fundamentals of orchard mechanization. Written by Professor Dr. Abdul Rahman Ayoub Al-Sabbagh. Basics of tractors and agricultural equipmental written by Mr. Lotfi Hussein Muhammad A
Main references (sources)	PDF (mechaniclub.com) كتاب ميكانيكا وهندسة الات زراعية

Course Description Form

1. Course Name:

Plane Surveyi

2. Course Code:

AH1912

3. Semester / Year:

Semester2023-2024

4. Description Preparation Date:

25/1/2024

5. Available Attendance Forms:

Attendance (theoretical + practical)

6. Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 3.5 units

7. Course administrator's name (mention all, if more than one name)

Name: Huthafia jaseem mohammd

Email: ag.huthafia.Jaseem@uoanbar.edu.iq

- 8. Course Objectives
- 1. Understand the basic principles of mathematics
- 2. Learn about the scanning that collects information fr the hospital
- 3. Read browser reading from private search data previously drawn browser reading
- 4. Learn about measuring methodist with simple tools and how each tworks
- 5. Use some surveying devices a learn about their parts and function of each one
- 9. Teaching and Learning Strategies

Strategy

- 1. Traditional means of explanation and clarification.
- 2. Electronic means of explanation and clarification.
- 3. Field work.
- 4. Adopting student groups for field work to take measurements.
- 5. Use of surveying devices and equipment.
- 6. Show illustrative pictures of surveying equipment, its accessories, a survey work accessories.
- 7. Show illustrative pictures of various field operations.

10. Course Structure

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation	
		Outcomes	name	method	method	
The first	5	Definition of surveying, ty of surveys, requirements for good survey, the importance surveying in agriculture	, ,	A lecture w explanation and clarification		
the second		Measurement systems, unit	Plane Surveying	A lecture w	The exam	

		measurement, errors mistakes	DI C	explanation and clarification	m
the third		selection conditions, field b arrangement	Plane Surveying	A lecture w explanation and clarification	The exam
the fourth	5	Errors in survey work, way address them and overce them		A lecture w explanation and clarification	
Fifth	5	Drawing scale, its ty categories, and determine factors	, ,	A lecture w explanation and clarification	The exam
VI		First month exam - theo			TENN.
Seventh	5	Areas, regular and irreg shapes, area with coordinate	Plane Surveying	A lecture w explanation and clarification	The exam
VIII	5	Leveling, its terminole types of adjustment, and to of the leveling device	Plane Surveying	A lecture w explanation and clarification	The exam
Ninth	5	Types of settlement, phenomena of curvature fracture and their treatment	Plane Surveying	A lecture w explanation and clarification	The exam
The tenth	5	Methods of calculating point levels and elevation differences, direct indirect	Plane Surveying	A lecture w explanation and clarification	The exam
Eleventh	5	Making longitudinal secti defining them, determinin central axis, determining a of points, and drawing scale	_	A lecture w explanation and clarification	The exam
Twelveth	5	Calculating point lev measuring distances, projecting the design and ac sections	Plane Surveying	A lecture w explanation and clarification	The exam
Thirteenth	Second month exam - theoretical and practical				
Fourteenth	5	Topographic m representation methods	Plane Surveying	A lecture w explanation and clarification	
Fifteenth	5	Contour lines, methods finding area and con interval, finding contour li line properties	Plane Surveying	A lecture w explanation and clarification	The exam
11. Course Evaluation					
1- Rapid daily te	sts.				

2- Theoretical tests. 3- Practical tests. 4- Research and reports.	
12. Learning and Teaching Resources	
Required textbooks (curricular books, if any)	Al-Khafaf, Riyad Saleh, 2000, Foundati of Plane Surveying and Topograp College of Agriculture, University Mosul, Iraq

Course Name:

General Plant

Course Code:

AH1914

Semester / Year:

2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Presence

22. Number of Credit Hours (Total) / Number of Units (Total)

75 (5 hours weekly)

23. Course administrator's name (mention all, if more than one name)

Name: assistant prof. Bushra Shaker Jassim Email: ag.bushra.shaker@uoanbar.edu.iq

24. Course Objectives

Course Objectives

- Teaching students the basics of scient
 related to plant
- Teaching students about the types of plant
- Teach students how to treat plants with pl growth regulators
- Teaching students the relationship physiology plant
- Teaching students the applications of us plant morphology in the field of field crops
- Teach students the type of plant

25. Teaching and Learning Strategies

Strategy

- A. Knowledge and Understanding
- A1- Enable students to acquire knowledge of the basics of science related to development.
- A2- Enable students to know the methods of controlling growth through treatment with plant growth regulators
- A3 Know the means and types of plant growth regulators.
- A4- Enabling students to obtain knowledge and understanding of the plant's hormonal needs.
- A5 Enable students to obtain knowledge and understanding of ways to improve hormonal growth.

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation
------	-------	-------------------	-----------------	----------	------------

		Outcomes	name	method	method
1	5	Knowledge terminology related plant growth regula and their applications Using electronic mean	plant cell	Lecture, discussion, reports, laboratories science movie	
2	5	Knowledge terminology related plant growth regula and their applications Using electronic mea	Prokaryotic and و eukaryotic cell	Lecture, discussion, reports, laboratories science movie	
3	5	Knowledge terminology related plant growth regula and their applications Using electronic mea	Cell wall mitochondria, chloroplast	Lecture, discussion, reports, laboratories science movie	Quick and mon exams, class acti and reports
4	5	Knowledge terminology related plant growth regula and their applications Using electronic mea	Plant structure, growth, development	Lecture, discussion, reports, laboratories science movie	Quick and mon exams, class acti and reports
5	5	Knowledge terminology related plant growth regula and their applications Using electronic mea	Root and modified root	Lecture, discussion, reports, laboratories science movie	Quick and mon exams, class acti and reports
6	5	First Exim	Exim	Lecture, discussion, reports, laboratories science movie	Quick and mon exams, class acti and reports

4. Description Preparation Date:

25/1/2024

5. Available Attendance Forms:

Personal presence

6. Number of Credit Hours (Total) / Number of Units (Total)

48/3

7. Course administrator's name (mention all, if more than one name)

Name: Asst. Pro. Dr. Ahmed Abdulrahman Majid

Email: ag.ahmed.abd-rahmman@uoanbar.edu.iq

8. Course Objectives

Course Objectives

- 1. Learn about computer terms and definitions
- 2. University degree in computer history and language
- 3. Knowing the computer's components, types, and uses.
- 4. Entering the world of viruses and knowing how to benefit from them on the computer.
- 5. Working on the computer through the Windows interface

9. Teaching and Learning Strategies

Strategy

Knowledge and understanding

Learn about the capabilities of printing, inserting images, tables, storing, and writing formatting. **Subject-specific skills:**

Students can develop skills by gaining sufficient experience to produce Microsoft Word files in a sophisticated and artistic style.

Teaching and learning methods:

The student relies for his understanding and learning on in-person lectures during this academic year

Evaluation methods:

Through daily and monthly exams, homework, oral exams, attendance, and various activities **thinking skills:**

The student relies on linking the topics of the lectures in order to provide a model answer that can benefit him in the monthly exams.

General and transferable skills (other skills related to employability and personal development).

The student can study the curriculum topics in a practical way to understand and comprehend the curriculum lectures through his visit to the laboratory.

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	3		Computer basics	(theoretical)	Daily exam
2	3		Electronic computer (computer)	(theoretical)	Daily exam + homework
3	3		Classification of computers based on operating system	(theoretical)	Daily exam + homework
4	3		Computer's components	(theoretical)	Monthly exam
5	3		Computer box	(theoretical)	Daily exam
6	3		Ports	(theoretical)	Daily exam + homework
7	3		Number systems	(theoretical)	Daily exam + homework
8	3		Computer security and software licenses	(theoretical)	Monthly exam
9	3		Electronic hacking	(theoretical)	Daily exam
10	3		Operating Systems	(practical)	Daily exam + homework
11	3		Windows operating system	(practical)	Daily exam + homework
12	3		Taskbar	(practical)	Monthly exam
13	3		Performing operations on windows	(practical)	Daily exam
14	3		control Board	(practical)	Daily exam + homework
15	3		Add an account	(practical)	Daily exam + homework
16	3		Installing programs	(practical)	Monthly exam

Monthly exam 60%, daily exam 20%, homework 10%, attendance 10%.

30 hours 2 units per week

7. Course administrator's name (mention all, if more than one name)

Name: abd al salam khalaf

Email: abd.khalaf@uoanbar.edu.ig

8. Course Objectives

- 1- Preparing students who believe in human rights and democracy
- 2- Instilling national values in the individual objectively
- 3- Helping in writing scientific research
- and society and combating forms of corrupti 4- Knowledge of the general rights and freedoms of the individual and society
 - 1- Practical application of public rights and freedom

9. Teaching and Learning Strategies

Strategy

1- Enabling students to obtain the intellectual framework

A believer in the strategy of human rights and public freedoms

- 2- Preparing a generation that is conscious and aware of the importance of rights and freedoms
- 3- Instilling the principles of patriotism and preserving it
- 4- Developing a culture of human rights and democracy among the individua and society
- 1- Developing students' cognitive awareness of the importance of human rights

And democracy

1. Course Name:

Principles of field crops

2. Course Code:

AH1910

3. Semester / Year:

Autumn, 2023-2024

4. Description Preparation Date:

25/1/2024

5. Available Attendance Forms:

presence only

6. Number of Credit Hours (Total) / Number of Units (Total):

45 hours per semester/3 hours per week

7. Course administrator's name (mention all, if more than one name)

Name: Ahmed Shehab Abdullah Ramadan Email: ag.ahmed.shehab@uoanbar.edu.iq

8. Course Objectives

Course Objectives

Teaching students the basics of field crop science from both theoretical and applied aspects, providing them with the required knowledge in growing field crops and how to deal with, manage, produce and improve them, and mastering the various crop service operations from planting to maturity and post-harvest operations, in addition to studying how to preserve and maintain the soil, sustaining its productivity, and mastering modern irrigation methods.

9. Teaching and Learning Strategies

Strategy

- -Education strategy, collaborative concept planning.
- -Education strategy brainstorming.
- -Education strategy notes series

Course Name:

Soil principles

Course Code:

AH1911

Semester / Year:

Semester/2, 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Attendance (theoretical + practical)

29. Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 3.5 units

Course administrator's name (mention all, if more than one 30. name)

Name: khaleel jameel Farhan

Email: khaleel. Farhan @uoanbar.edu.iq

31. Course Objectives

- 1. Identify the soil, which is the upper part of the eart 4. Learn about analysis methods
- 2. Understanding the mechanism of soil formation a 5. Use some laboratory equipm development.

3.

Identify the physical, chemical, fertility and biologi characteristics of soil for each type of soil.

- each soil characteristic.
- and field tools.

32. Teaching and Learning Strategies

Strategy

- 1. Traditional means of explanation and clarification.
- 2. Electronic means of explanation and clarification.
- 3. Field work.
- 4. Adopting student groups for field work to take measurements.
- 5. Use of surveying devices and equipment.
- 6. Show illustrative pictures of the devices and their accessories.

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation
		Outcomes	name	method	method
1	5	Rocks and Minerals	Soil principles	A lecture with explanation and clarification	The exam

2	5	Soil development and formation	Soil principles	A lecture with explanation and clarification	The exam

Course Name:

Statistics

Course Code:

AH1914

Semester / Year:

Spring, 2023-2024

Description Preparation Date:

25 /1/ 2024

Available Attendance Forms:

attendance is according to the weekly lecture schedule

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Units 3.5

Course administrator's name (mention all, if more than one name)

Name: Prof. Dr. Maath Mohey Mohammed Shareef

Email: ag.maath.mohey@uoanbar.edu.iq

Course Objectives

Course Objectives:

- Teach students the importance of statistics.

- Teaching students about the sciences related to statistics
- . Study statistical symbols and apply them practically.
- 4- Study of the graphical representation of agricultural data
- 5- Identify measures of central tendency
- 6- Study of dispersion metrics

Teaching and Learning Strategies

Strategy:

Follow the lecture method and use modern presentation methods.

Group dialogues.

Direct dialogue with students by asking them questions.

Brainstorming strategy.

Cooperative education strategy.

Course Name:

Principles of agricultural economics

Course Code:

AH 1915

Semester / Year:

Second semester, 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

regularity (attendance)

Number of Credit Hours (Total) / Number of Units (Total)

75 Hour / 3.5 unit

Course administrator's name (mention all, if more than one name)

Name: Eyid Abbas Abdalltef

Email: ag.eyid.abbas@uoanbar.edu.iq

Course Objectives

Course Objectives

A- Providing the student with the basic principles of agricultural economics and general economic principles.

B - Introducing students to the most important economic activities and functions carried out by the agricultural economy. C- Introducing the most important branches and specializations of agricultural

economics.

D- Introducing the economic and standard criteria and foundations that the agricultural economy relies on in

production.

E - Introduce the student to the relationship the agricultural economy with other econoproductive sectors.

Teaching and Learning Strategies

Strategy

A theoretical clarification of the vocabulary of the subject, using data to understand the scientific subject

Using graphs in scientific material, student participation in lectures Conduct daily and monthly tests.

1. Course Name:

Engineering Drawing

2. Course Code:

AH 1916

3. Semester / Year:

first semester, 2023-2024

4. Description Preparation Date:

25\1\2024

5. Available Attendance Forms:

Attendance

6. Number of Credit Hours (Total) / Number of Units (Total)

45\2

Course administrator's name (mention all, if more than one name)

Name: Marwa Yass Khudair

Email: ag.marwa.yass@uoanbar.edu.iq

8. Course Objectives

Basic Understanding: Introducing students to the fundame concepts of geometric drawing, including symbols, dimensicand scales. Analysis and Interpretation: Empowering students analyze and interpret geometric drawings and diagrams efficier Technical Skills Development: Enhancing students' skills in us geometric drawing tools such as traditional tools like ruler compass.

9. Teaching and Learning Strategies

Strategy

Interactive Teaching: Using classroom discussions and workshops to enhance interaction am students and exchange of ideas. This helps deepen students' understanding of geometric draw concepts and their applications.

Flipped Classroom: Students review theoretical content outside the classroom, while class tin allocated for practical applications.

Cooperative Learning: Encouraging students to work in groups to promote collaboration knowledge exchange, leading to improved communication and teamwork skills.

Utilization of Diverse Resources: Providing a wide range of educational resources, incluinstructional videos, e-books, and scientific articles, to enhance understanding and explanowledge.

Course Name:

Computer/ 2

Course Code:

AH1917

Semester / Year:

second/ 2023-2024

Description Preparation Date:

2024/1/25

Available Attendance Forms:

Personal presence

Number of Credit Hours (Total) / Number of Units (Total)

48/3

Course administrator's name (mention all, if more than one name)

Name: Asst. Pro. Dr. Ahmed Abdulrahman Majid

Email: ag.ahmed.abd-rahmman@uoanbar.edu.iq

Course Objectives

Course Objectives

- 1. Knowing how to operate Microsoft Word
- 2. Study the basic principles of using the mouse and keyboard
- 3. Study how to work on Microsoft Word
- 4. Learn how to store files in Microsoft Word format

Teaching and Learning Strategies

Strategy

Knowledge and understanding

Learn about the capabilities of printing, inserting images, tables, storing, and writing formatting. **Subject-specific skills:**

Students can develop skills by gaining sufficient experience to produce Microsoft Word files in a sophisticated and artistic style.

Teaching and learning methods:

The student relies for his understanding and learning on in-person lectures during this academic year

Evaluation methods:

Through daily and monthly exams, homework, oral exams, attendance, and various activities **thinking skills:**

The student relies on linking the topics of the lectures in order to provide a model answer that can benefit him in the monthly exams.

General and transferable skills (other skills related to employability and personal development).

The student can study the curriculum topics in a practical way to understand and comprehend the curriculum lectures through his visit to the laboratory.

Week	Hours	Required	Unit or subject name	Learning	Evaluation
		Learning		method	method

		Outcomes			
1	3		Turning The Calculator On And Off	(practical)	Daily exam
2	3		Learn About Windows Principles	(practical)	Daily exam + homework
3	3		How To Run Microsoft Word	(practical)	Daily exam + homework
4	3		File Tab Details	(practical)	Monthly exam
5	3		Home Tab Details	(practical)	Daily exam
6	3		Insert Tab Details	(practical)	Daily exam + homework
7	3		Page Layout Tab Details	(practical)	Daily exam + homework
8	3		References Tab Details	(practical)	Monthly exam
9	3		Messages Tab Details	(practical)	Daily exam
10	3		Review Tab Details	(practical)	Daily exam + homework
11	3		View Tab Details	(practical)	Daily exam + homework
12	3		Details Tab Design In The Table	(practical)	Monthly exam
13	3		Layout Tab Details In The Table	(practical)	Daily exam
14	3		Format Tab Details In Image	(practical)	Daily exam + homework
15	3		Abbreviations In The Program	(practical)	Daily exam + homework
16	3		Professionalism Using The Program	(practical)	Monthly exam

Course Description Form(The Second Stage)

36. Course Name:

Crimes of the defunct Baath Party

Course Code: 37.

AH1920

38. Semester / Year:

SEMESTER 2023-2024

39. **Description Preparation Date:**

25/1//2024

40. Available Attendance Forms:

Presence

41. Number of Credit Hours (Total) / Number of Units (Total)

30 hours 2 units per week

Course administrator's name (mention all, if more than one name)

Name: mohammed kareem shaker

Email: ag.mohammed.kareem@uoanbar.edu.iq

43. Course Objectives

1-Preparing educated students with correct ideas

2- Instilling noble values and morals

- 3- Helping in writing scientific research objectively
- 4- Know the facts and not falsify them
- 5- Knowing the repressive methods used by the former regime

44. Teaching and Learning Strategies

- **Strateg** 1- Enabling students to obtain the intellectual framework
 - 2- Preparing students with a correct culture
 - 3- Instilling and preserving the principles of patriotism
 - 4- Developing the intellectual side of students
 - 5- Vocabulary formulation and its absence
 - 6- Expanding cognitive awareness

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	Theory and Pract.		Introduction to microbiology	Giving lectures	Quiz+ activities
2	Theory and Pract.		The location of microorganisms among living organisms.	Giving lectures	Quiz+ activities
3	Theory and Pract.		Characteristics of microorganisms	Giving lectures	Quiz+ activities
4	Theory and Pract.		Structure of bacteria and functions of their parts.	Giving lectures	Quiz+ activities
5	Theory and Pract.		Nutrition of microorganisms. Bacterial nutrition	Giving lectures	Quiz+ activities
6	Theory and Pract.		Growth and reproduction of bacteria. Isolation of bacteria in pure culture,	Giving lectures	Quiz+ activities
7	Theory and Pract.		preservation of bacterial cultures, cell cycle, growth phases, estimation of bacterial growth,	Giving lectures	Quiz+ activities
8	Theory and Pract.		Mycoplasma, Phytoplasma, Rickettsia	Giving lectures	Quiz+ activities
9	Theory and Pract.		- Microbial genetics, nucleic acid synthesis, DNA replication, RNA replication, protein synthesis, heterogeneity in bacteria, genetic mutations, genetic exchange (conjugation),	Giving lectures	Quiz+ activities
10	Theory and Pract.		- Viruses their discovery, physical properties, and chemical composition. Virus division	Giving lectures	Quiz+ activities

11	Theory and Pract.	- Fungi. External appearance, parasitism, fungal cell structure, changes in the vegetative structure of the fungus,	Giving lectures	Quiz+ activities
12	Theory and Pract.	- Algae: Botozoa: Soil microorganisms. Food—sources of food contamination, control of sources of contamination,	Giving lectures	Quiz+ activities
13	Theory and Pract.	- Microorganisms in milk and its products, microorganisms in vegetables and fruits. Damage	Giving lectures	Quiz+ activities
14	Theory and Pract.	- Control of microorganisms.	Giving lectures	Quiz+ activities
15	Theory and Pract.	Third month exam	Giving lectures	Quiz+ activities

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

Required textbooks (curricular books, if any)	Principals of Microbiology Dr. Khalaf Soofi Al-Delaimy		
Main references (sources)	Relying on recent scientific research and publications issued by reputable international publishing houses and journals		
Recommended books and references (scientific journals, reports)	Scientific journals related to the field of microbiology

Course Name:

Organic Agriculture

Course Code:

AH1922

Semester / Year:

First Semester, 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Theoretical material is given 100%.

Practical material is given 100%

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Units 3.5

Course administrator's name (mention all, if more than one name)

Name: Dr. omar hashim muslah Email: ohmosleh@uoanbar.edu.iq

Course Objectives

Course Objectives:

- 1- Study the importance of science related to organic growth and agriculture
- 2- Identify agricultural systems
- 3- Knowing the suitable soil for each agricultura crop.
- 4- Teaching the student to work in agricultural media
- 5- Teaching students sterilization methods
- 6- Identify the work of waste

Teaching and Learning Strategies

Strategy:

- 1- Follow the lecture method and use modern presentation methods.
- 2- Conduct laboratory experiments.
- 3- Direct dialogue with students by asking them questions.
- 4- Homework assignments (writing scientific reports).
- 5- Learning through applied laboratory work

Course Structure

Course Name:

Landscape Design Principles

Course Code:

AH1923

Semester / Year:

Autumn(First) / 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Theoretical subject: It is given through the lecture program

Practical subject: practical application

Field visits

Summer Training

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Theoretical 45 hours / practical Total 75 hours

Course administrator's name (mention all, if more than one name)

Assent. Prof. Dr. Zeyad Mohammed Abdulrazzaq

zeyadmohammed@uoanbar.eud.iq

Course Objectives

Knowledge of garden design concepts and related scientific, engineering and botanical terminology.

Recognize the elements, principles, and rules used in garden design

Recognize the importance of landscaping and garden design

Learn how to draw 2D gardens and recognize the botanical and industrial symbols used in the design

Recognize how to implement garden design

The student knows how to start designing gardens according to the scientific stages.

The student knows the basic requirements in the garden design process

Recognize the garden models and the obstacles faced by each model and how to overcome them

Recognize examples of different international, Arab and local garden designs Drawing proposed designs for gardens

Teaching and Learning Strategies

Brainstorming

Thinking strategy according to the student's ability

Critical Thinking is a term that symbolizes the highest level of thinking that aims to pose an issue and then analyze it logically to reach the required solution.

Strategies of presentation, coordination, training, discussion, talking, listening, writing, reading, reading, thinking and reflecting

Cognitive strategies, which are concerned with analyzing the topics to be studied, including naming, explaining, detailing, and organizing.

Metacognitive strategies, which are concerned with managing the learning process, such as selective attention to a specific topic or part of it, monitoring understanding, controlling comprehension, and conducting self-evaluation of what has been learned.

Social or affective strategies that are concerned with students' interaction with the teacher on the one hand and students' interaction with each other on the other hand, such as discussion and dialog with oneself.

These strategies can be achieved through:

Adopting the method of giving theoretical lectures using various modern means of explanation, through which the design systems used in the past and present are recognized in terms of the pros and cons of each design and how to overcome the negatives.

Following the method of practical application through which it aims to:

Introduce the student to how to start designing gardens according to the scientific stages.

The student knows the basic requirements in the garden design process

The student knows how to select and analyze design sites and develop appropriate design proposals for each proposed site, whether private or public gardens or green belts.

Recognize the design programs used to develop proposed designs.

Creating different designs for gardens after selecting different sites, and this is done on A3 paper and then applied on the ground or making miniature models of the proposed designs

Opening the door for discussion to exchange ideas with students, as well as applying the question and answer strategy.

Assigning students homework, writing reports and studies, and conducting field visits. Conducting daily and monthly theoretical and practical tests.

Course Structure

Week	Hour s	Required Learning Outcomes	Unit or subject name	Learning method	Evaluatio n method
The first	5	Introduction and Definitions - Terms - Design, designer, garden, outdoor space and more	Landscape Design Principles	Explain the lecture and practice using drawing tools (ruler, triangles, pens, regular and grainy papers)	Discuss, ask questions, give examples, and quiz students
Second	The relationship of landscape design to d 5 other arts and sciences Design elements of		Landscape Design Principles	Explain the lecture and practice framing the design board space (A4 and	Discuss, ask questions, give examples,

		gardens and outdoor spaces (line - shape - form - texture - space)		A3) with information key, symbols, scale and north orientation	and quiz students
Third	5	Elements of garden design (scale, color, time, light and shadows)	Landscape Design Principles	Explain, present the lecture and conduct the practical application of the first exercise - recognizing and drawing all types of lines (straight, oblique, curved).	Discuss, ask questions, give examples, and quiz students
Fourth	5	Foundations and rules for designing gardens and outdoor spaces (simplicity - unity or cohesion - dominance of garden faces and others)	Landscape Design Principles	Explain and present the lecture and conduct the practical application of the second exercise - Recognizing the different plant and structural symbols and how to draw them	Discuss, ask questions, give examples, and quiz students
Fifth	5	Basic principles and rules in the design of gardens and outdoor spaces (color predominance - diversity or harmonious repetition - balance - proportion and scale)	Landscape Design Principles	Explain and present the lecture and conduct the practical application of the second exercise - Drawing different botanical and structural symbols on the drawing board and how to distribute them and apply the drawing scale when drawing them.	Discuss, ask questions, give examples, and quiz students
Sixth	5	Principles and rules	Landscape	Explain and	Discuss,

		of garden and outdoor space design (Emphasis - Sequence - Expansion)	Design Principles	present the lecture and conduct the practical application of the third exercise - overlapping lines and symbols to form 2D shapes	ask questions, give examples, and quiz students
Seventh	5	Foundations and rules of garden and outdoor space design (axis of design - symmetry and its types - time factor)	Landscape Design Principles	Explain the lecture presentation and practical application of the fourth exercise - Recognizing the relationships between different shapes and symbols (overlapping, touching, etc.) and how to draw them.	Discuss, ask questions, give examples, and quiz students
Eighth	5	Factors influencing the design of gardens, in light of which the design idea is developed.	Landscape Design Principles	Explanation and presentation of the lecture and practical application of the fifth exercise - Training on the use of different pens in drawing and explaining how to use each type on the drawing board.	Discuss, ask questions, give examples, and quiz students
Ninth	5	Steps to draw the design of gardens and outdoor spaces	Landscape Design Principles	Explanation and presentation of the lecture and practical application of the sixth exercise - Training on transferring and drawing different garden designs	Discuss, ask questions, give examples, and quiz students

				from reality to the drawing board and explaining the mistakes made by the designer and how to avoid them in the future.	
The tenth	5	Steps to implement the design of gardens and outdoor spaces	Landscape Design Principles	Explanation and presentation of the lecture and practical application of the seventh exercise - conducting a test for students to draw different gardens depending on the student's imagination in expressing different designs.	Discuss, ask questions, give examples, and quiz students
Eleventh	5	Chronology of garden design (Mesopotamian Gardens - Pharaonic Egyptian Gardens - Persian Gardens)	Landscape Design Principles	Explain and present the lecture and conduct the practical application of the eighth exercise - dividing students into groups to compete among them in designing one of the selected gardens at the college site.	Discuss, ask questions, give examples, and quiz students
Twelfth	5	The historical sequence of garden design (Greek Gardens - Roman Gardens - Chinese Gardens)	Landscape Design Principles	Explaining and presenting the lecture and presenting the designs of the previous stages to learn how to discuss, analyze,	Discuss, ask questions, give examples, and quiz students

					give feedback, etc. and benefit from previous experiences	
Thirteenth	5	Historical sequence of garden design (Arab Islamic Andalusian Gardens - Mughal Gardens)	Lands Desi Princi	ign	Explain and present the lecture and have the students prepare design ideas for each of them (to start the orientation and preparation)	Discuss, ask questions, give examples, and quiz students
Fourteenth	5	Historical sequence of garden design (Italian Gardens - French Gardens)	Lands Desi Princi	ign	Explaining and presenting the lecture and presenting the design ideas for discussion in front of colleagues and presenting the design steps and the obstacles they faced	Discuss, ask questions, give examples, and quiz students
Fifteenth	5	Historical Sequence of Garden Design (French Gardens - English Gardens - Modern Gardens)	Lands Desi Princi	ign	Explanation and presentation of the lecture and presentation and discussion of all designs	Discuss, ask questions, give examples, and quiz students

Course Name:

Plant genetics

Course Code:

AH1924

Semester / Year:

Autumn, 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

attendance is according to the weekly lecture schedule

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Units 3.5

Course administrator's name (mention all, if more than one name)

....

Name: Prof. Dr. Maath Mohey Mohammed Shareef

Email: ag.maath.mohey@uoanbar.edu.iq

Course Objectives

Course Objectives:

- Teach students the importance of genetics.
- Teaching students about the sciences related to genetics
- . Study the nature of genetic material .

Study of inheritance in plants .

Learn about Mendel's laws.

Learn about modern technologies in genetics .

Teaching and Learning Strategies

Strategy:

Follow the lecture method and use modern presentation methods.

Group dialogues.

Direct dialogue with students by asking them questions Brainstorming strategy.

Cooperative education strategy.

Course Objectives

Course Objectives

Identifying the types of insects that afflict plants grown within orchain whether vegetables or fruits, along with understanding their harm stages and damage, along with methods of control.

Teaching and Learning Strategies

Strategy

Adopting the method of delivering lectures and linking each topic with examples from the actual practice of agriculture, while providing students with simple practical exercises that are discussed and solved during the lecture, with the participation of all students in the class along with the professor to enhance interaction. Additionally, training students in laboratories by conducting necessary laboratory tests for diagnosis.

Course Name:

Plant Nutrition

Course Code:

AH1926

Semester / Year:

Spring 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Theoretical material is given 100% in person.

Practical material is given 100% in person.

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / units 3.5

Course administrator's name (mention all, if more than one name)

Name: Dr. omar hashim muslah Email: ohmosleh@uoanbar.edu.ig

Course Objectives

Course Objectives

Studying the various nutritional factors affecting grov

and yield formation

Learn about ways to divide nutrients

Knowing the appropriate soil for each agricultural crd

Knowing the harms and benefits of nutrients.

Learn about ways to feed horticultural plants.

Identify the nutritional needs of plants

Teaching and Learning Strategies

Strategy

- 1- Follow the lecture method and use modern presentation methods.
- 2- Conduct field experiments of the media.
- 3- Direct dialogue with students by asking them questions.
- 4- Homework assignments (writing scientific reports).
- 5- Learning through applied field work.

Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
The first	5	the computer A modern mobile device Observations and	applications Introduction to plant nutrition	electronic lectu and practical application in laboratories and	discussions a examples

		field		fields	
Second	5	the computer A modern mobile device Observations and field	applications Soil as a medium for plant growth and the readiness of nutrients	electronic lectu and practical application in laboratories and fields	discussions a examples
Third	5	the computer A modern mobile device Observations a field	lectures and practical application in laboratories and field	electronic lecturand practical application in laboratories and fields	Questions, discussions a examples
Fourth	5	the computer A modern mobile device Observations a	applications Nutrient absorption (ionic absorption and its theories	electronic lectu and practical application in laboratories and fields	Questions, discussions a examples
Fifth	5	the computer A modern mobile device Observations a	First Exam	electronic lectu and practical application in laboratories and fields	Questions, discussions a examples
Sixth	5	the computer A modern mobile device Observations a field	applications of water, plant nutrition and water physiological need	electronic lecturand practical application in laboratories and fields	discussions a examples
Seventh	5	the computer A modern mobile device Observations a	Plant nutrition and th amount of yield (the relationship of the pla to the yield	and practical	discussions a examples
Eighth	5	the computer A modern mobile device Observations a	Plant nutrition, diseas and insect resistance	electronic lectu and practical application in laboratories and fields	discussions a examples
	5	the computer A modern mobile device Observations and field	Plant nutrition, diseas and insect resistance	electronic lectu and practical application in laboratories and fields	discussions a examples
Ninth	5	the computer A modern mobile dev Observations a field	Soil salinity and plant nutrition	electronic lectu and practical application in laboratories and fields	Questions, discussions a examples

Thirteenth	5	the computer A modern mobile device Observations a field	Organic soil, organic fertilization and organic farming: importance, organic farming and integrative fertilization And the role of organ farming in sustainable agriculture	electronic lectu and practical application in laboratories and fields	discussions a examples

Course Evaluation

- 1- Monthly exams.
- 2- Rapid exams (Quazat).
- 3- Evaluation through classroom activity.
- 4- By preparing scientific reports and taking advantage of information networks.
- 5- Final exams.

Course Name:

Plant Physiology

Course Code:

AH19212

Semester / Year:

Spring (Second) / 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Theoretical subject: It is given through the lecture program

Practical subject: practical application

Field visits

Summer Training

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Theoretical

45 hours / practical

Total 75 hours

Course administrator's name (mention all, if more than one name)

Prof. Dr. Rasmi Mohammed Hamad

ag.rassme.mohammed@uoanbar.edu.iq

Dr. Idrees Hussein Mola Salih Mohammed

idresshussein@uoanbar.edu.iq

Dr. Noor Taha Abd

Noor.taha@uoanbar.edu.iq

Course Objectives

Learn about plant physiology

The study of the plant cell, its components and their respective functions

Recognize water relations (diffusion, osmosis, osmosis, permeability)

Recognize the mechanism of absorption and transport of water and salts through the plant

Study transpiration, its types and benefits to the plant

Study respiration and its types and benefits to the plant

Recognize photosynthesis and the mechanism of its occurrence in the plant and its importance to the plant

Teaching and Learning Strategies

Brainstorming

Thinking strategy according to the student's ability

Critical Thinking is a term that symbolizes the highest level of thinking that aims to pose an issue and then analyze it logically to reach the required solution.

Strategies of presentation, coordination, training, discussion, talking, listening, writing, reading, reading, thinking and reflecting

Cognitive strategies, which are concerned with analyzing the topics to be studied, including naming, explaining, detailing, and organizing.

Metacognitive strategies, which are concerned with managing the learning process, such as selective attention to a specific topic or part of it, monitoring understanding, controlling comprehension, and conducting self-evaluation of what has been learned.

Social or affective strategies that are concerned with students' interaction with the teacher on the one hand and students' interaction with each other on the other hand, such as discussion and dialog with oneself.

These strategies can be achieved through:

Adopting the method of giving theoretical lectures using various modern means of explanation, through which the design systems used in the past and present are recognized in terms of the pros and cons of each design and how to overcome the negatives.

Following the method of practical application.

Opening the door for discussion to exchange ideas with students, as well as applying the question and answer strategy.

Assigning students homework, writing reports and studies, and conducting field visits. Conducting daily and monthly theoretical and practical tests.

Course Name:

Nurseries and Propagation

Course Code:

AH19213

Semester / Year:

2023-2024

Description Preparation Date:

2024/1/25

Available Attendance Forms:

It is given in the presence of the students

Number of Credit Hours (Total) / Number of Units (Total)

75 hours / 3.5 units

Course administrator's name (mention all, if more than one name)

Name: Assist. Prof. Dr. Atheer Mohammed Ismail Email: ag.atheer.mohammed@uoanabr.edu.iq

Course Objectives

Course Objectives

- **1** Introducing the student to the basics of global plants propagation and the facility for propagation of plants in greenhouses, glass houses, cold and heated beds, and others.
- **2** Introducing the student to the basics of global plant propagation and plant propagation facility.
- **3** A brief history of the initiation and evolution of plant propagation.
- **4** Introduce the student to the methods of vegetative propagation of plants and the cellular foundation of seeds propagation.

Teaching and Learning Strategies

Strategy

- 1- Follow the lecture style with the use of modern means of presentation.
- 2- Conducting laboratory experiments.
- 3- Direct dialogue with students by asking them questions.
- 4- Homework (writing scientific reports).
- 5- Learning through applied field practices.

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation		
		Outcomes	name	method	method		
The first	5 hr.	1- Lectures	Theoretical: The	Theoretical	Questions,		
		2 - the computer	evolution of plant	lectures	discussions		
		3 - A modern mobile	propagation in human	and	and examples		
		device	society, Sexual	practical			
		4- Observations and	propagation by seeds,	application			
		field application	Seed development,	laboratories an			

			Maturadicands	fields.	
			Matured seeds,	neids.	
			Apomixis phenomena,		
			Types of		
			apomixes, Polyembryo		
			Practical: Nursery,		
			Types of		
			nurseries, Requiremen		
			that must be fulfilled t		
			establish a nursery		
Second	5 hr.	1- Lectures	Theoretical: Seed	Theoretical	Questions,
		2 - the computer	dormancy, The	lectures	discussions
		3 - A modern mobile	advantages of seed	and	and examples
		device	dormancy, Seed	practical	
		4 - Observations and	dormancy causes (See	•	
		field application	coats hardness,	laboratories an	
			Inhibitors in seed	fields.	
			coverings or in embryo		
			The embryo is not fully		
			developed, Requireme		
			for therapy at		
			specific temperatures)		
			i		
			Stages of dormancy,		
			Types of dormancy		
			Practical: Nursery		
			facilities (Span		
			houses,		
			Lathhouses,		
			Greenhouses, Cold bed		
			Hot beds), Agricultural		
			media		
			used in plant		
			propagation (Sand, Pe		
			Peat moss, Sphagnum		
			moss, Sawdust and		
			bark, Vermiculite, Perl		
Third	5 hr.	1- Lectures	Theoretical:	Theoretical	Questions,
		2 - the computer	Seed germination,	lectures	discussions
		3 - A modern mobile	Stages of seed	and	and examples
		device	germination,	practical	•
		4 - Observations and	Environmental	application	
		field application	factors influencing the	= =	
		''	germination of seeds	fields.	
			Practical: Treatments		
			that stimulate seed		
			germination		
			(Scarification,		
			Stratification, Soak the		
			seeds in water, Treatin		
			-		
			seeds with plant grow		

			regulators)		
Fourth	5 hr.	1- Lectures	Theoretical: Asexual	Theoretical	Questions,
		2 - the computer	propagation (Vegetativ	lectures	discussions
		3 - A modern mobile	propagation), Cellular	and	and examples
		device	foundations of	practical	
		4 - Observations and	vegetative propagation		
		field application	Reasons for	laboratories an	
			using vegetative	fields.	
			propagation, The clone		
			Genetic variations in		
			vegetatively propagate		
			plants (Mutations,		
			Chimera, Bud sports)		
			Practical: Seeds		
			extraction, Methods o		
L:trp	ГЬи	1 1004	cultivation seeds	Theoretical	Overtions
Fifth	5 hr.	1- Lectures	Exam	Theoretical	Questions, discussions
		2 - the computer 3 - A modern mobile		lectures and	and examples
		device		practical	and examples
		4 - Observations and		application	
		field application		laboratories an	
		neid application		fields.	
Sixth	5 hr.	1- Lectures	Theoretical: Vegetativ		Questions,
		2 - the computer	propagation by cutting	lectures	discussions
		3 - A modern mobile	Conditions that must b		and examples
		device	met for propagating by	practical	•
		4 - Observations and	cuttings, Advantages o	application	
		field application	propagation by cutting	laboratories an	
			Kinds of cuttings, The	fields.	
			cellular and anatomica		
			foundations of		
			adventitious roots		
			formation		
			Practical: Transactions		
			that encourage the formation of adventition		
Seventh	5 hr	1- Lectures	roots on cuttings Theoretical: Factors	Theoretical	Questions,
Seventil	J 111.	2 - the computer	affecting the formation		discussions
		3 - A modern mobile	of adventitious roots,	and	and examples
		device	Internal plant-related	practical	and examples
		4 - Observations and	factors, Therapies that	•	
		field application	will enhance the moth		
			plant's physiological	fields.	
			status, (Etiolation,		
			Girdling, Wounding),

			external factors		

			Dractical Dracas the		
			Practical: Prepare the		
			cuttings, Practical		
			applications for		
			propagation by cutting		
			Preparing plant growth		
			regulators solutions		
			for treating cuttings		
Eighth	5 hr.	1- Lectures	Theoretical: The	Theoretical	Questions,
		2 - the computer	theoretical foundation	lectures	discussions
		3 - A modern mobile	of budding and graftin	and	and examples
		device	Propagation purposes	practical	•
		4 - Observations and	budding and grafting.	application	
		field application	Practical: Seedlings	laboratories an	
		neia application	individualization,	fields.	
			· ·	neius.	
			Seedlings acclimatizati		
			Transporting and		
			cultivation seedlings in		
			permanent location		
Ninth	5 hr.	1- Lectures	Theoretical: Bud unior	Theoretical	Questions,
		2 - the computer	formation, Steps unior	lectures	discussions
		3 - A modern mobile	the shield budding	and	and examples
		device	process, Compatibility	practical	
		4 - Observations and	and incompatibility, Th	•	
		field application	mutual effects betwee		
			rootstock and scion	fields.	
			Practical: Methods of	ricias.	
			propagation by budding		
Tenth	5 hr.	1- Lectures	Theoretical: Preparing	Theoretical	Questions,
Tenti	J III.			lectures	discussions
		2- the computer	bud sticks, The characteristics of the		
		3 - A modern mobile		and	and examples
		device	rootstocks utilized in t	•	
		4 - Observations and	budding process, the	application	
		field application	height of budding region		
			Budding procedure da	fields.	
			Practical: Methods of		
			propagation by buddir		
Eleventh	5 hr.	1- Lectures	Exam	Theoretical	Questions,
		2 - the computer		lectures	discussions
		3 - A modern mobile		and	and examples
		device		practical	•
		4 - Observations and		application	
		field application		laboratories an	
				fields.	
Twelfth	5 hr.	1- Lectures	Theoretical: Grafting,	Theoretical	Questions,
iwellul	J 111.		The cellular and		discussions
		2- the computer		lectures	
		3 - A modern mobile	anatomical foundation		and examples
		device	of grafting, Advantage	practical	
		4 - Observations and	and disadvantages of	application	
		field application	propagation by graftin	laboratories an	

			Selection and storage	fields.	
			graft budsticks	neius.	
			Practical: Methods of		
		4	propagation by graftin		
Thirteen	5 nr.	1- Lectures	Theoretical: Layering,	Theoretical	Questions,
		2 - the computer	Advantages of layering		discussions
		3 - A modern mobile	Factors affecting the	and	and examples
		device	success of propagation		
		4 - Observations and	by layering, Simple	application	
		field application	layering	laboratories an	
			Practical: Methods of	fields.	
			propagation by layerin		
Fourteer	5 hr.	1- Lectures	Theoretical: Vegetativ	Theoretical	Questions,
		2 - the computer	propagation by	lectures	discussions
		3 - A modern mobile	specialized parts, Bulb	and	and examples
		device	Corms, Tubers,	practical	•
		4- Observations and	Rhizomes, Offsets	application	
		field application	Practical: Plant	laboratories an	
		P P	modifications suitable	fields.	
			natural propagation		
			(Runners, Stolens,		
			Offsets, Suckers, Crow		
			divicion)

Course Name:

Agricultural of agriculture Extension

Course Code:

AH19214

Semester / Year:

2023-2024

Description Preparation Date:

2024/1/25

Available Attendance Forms:

My attendance is according to the lecture schedule

Number of Credit Hours (Total) / Number of Units (Total)

30 hour

Course administrator's name (mention all, if more than one name)

Name: Dr. Mukhalad Hadi Ismali Email: mhalani@uoanbar.edu.iq

Course Objectives

Course Objectives

1- Extension to know agricultural extension, through the definition and philosophy

agricultural extension.

2- Clarifying the objectives of agricultural extension, the role of agricultural extension

- educating farmers and peasants.
- 3- The role of agricultural extension in rural development, and an explanation of position of agricultural extension among agricultural sciences.
- 4- Showing agricultural extension systems and linking them to the principles organization and the functions of the administrative organization of agricultural extensions.
- 5- Agricultural extension organization in Iraq and communication, elements communication, adoption
- 6- Roads and agricultural extension aids.

Teaching and Learning Strategies

Strategy

- 1- Follow the lecture method and use modern presentation methods
- 2- Direct dialogue with students by asking them questions
- 3- Homework (writing scientific reports)

Week	Hours	•	Required Learning U Outcomes s		Learning method	Evaluation method	
1- Course Stru	ıcture

Course Name:

Weeds

Course Code:

AH19215

Semester / Year:

2023-2024

Description Preparation Date:

2024-1-25

Available Attendance Forms:

in person

Number of Credit Hours (Total) / Number of Units (Total)

30 Theoretical Hours + 45 Practical Hours

3 units

Course administrator's name (mention all, if more than one name)

Name: Dr. yas amen mohammed

Email: ag.yass.ameen@uoanbar.edu.iq

Course Objectives

- A Expanding the students' theoretical and practical perceptions regarding weed control.
- B Study the description of weed and its characteristics related to the weed biology.
- C Identify the damages of weed to agricultural production and the ecosystem.
- d Getting acquainted with the methods of combating weed and the modern technologies used in this field.

Teaching and Learning Strategies

Strategy

- -Increasing students' awareness of modern trends in managing and protecting pastures.
- -Using Power Point presentation methods to convey information well and clearly to the student And Urging students to take advantage of Google search engines while asking them to submit scientific reports on the topics given to them in the academic subject.
- Semester and final exams are considered a reflection of the student's commitment and cognitive and skill achievement.

1. Course Name:

Computer / 4

2. Course Code:

AH19216

3. Semester / Year:

2023-2024

4. Description Preparation Date:

25/1/2024

5. Available Attendance Forms:

in-person learning

6. Number of Credit Hours (Total) / Number of Units (Total)

30/1 (practical only)

7. Course administrator's name (mention all, if more than one name)

Name: Dr.Bilal Yaseen Taher

Email: ag.bilal.yaseen@Uoanbar.edu.iq

8. Course Objectives

Course Objectives

Ability to understand the principle of PowerPoint program, Increasing the skills of students for using it to solve the problems, Ability the undergraduate students to use these skills in different fields, Ability the students to show their presentations of researches by data sho

9. Teaching and Learning Strategies

Strategy

Using these computer essentials and skills in different applications. Using the computer programs to do the presentations for your seminars and researches by data show. Ability of student to evaluate the problems, and writing then scientific reports. The student can acquire the practical and scientific experience in his specialized field it.

Name: mohammed kareem shaker

Email: ag.mohammed.kareem@uoanbar.edu.ig

Course Objectives 20.

- 1- Preparing students, including the Arabic language
- 2- Instilling the values of the Arabic language the hearts of students
- 3-Assistance in writing scientific research in objective Arabic
- 4- Familiarity with Arabic language vocabulary and correct spelling
- 5- Knowing the common mistakes

21. Teaching and Learning Strategies

- Strateg 1- Enabling students to obtain the intellectual framework for the Arabic language subject
 - 2- Preparing students linguistically and educationally
 - 3- A solid knowledge of the Arabic language vocabulary that enables the student formulate Arabic vocabulary
 - 4- Avoid spelling mistakes
 - 5- Correct pronunciation of some vocabulary
 - 6- Expanding cognitive awareness

Course Description Form(The Third Stage)

Course Name:

Deciduous fruits / 1

Course Code:

AH1930

Semester / Year:

2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Presence

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Units 3.5

Course administrator's name (mention all, if more than one name)

Name: Sameer abed ali

Email: sameer.abed@uoanbar.edu.ig

Name: Gaith Ibrahim abed

Email: Gaith 882020@ uoanbar.edu.iq

Course Objectives

Course Objectives:

1- Identifying the most important strategic deciduous fruit varieties growing in the conditions of Iraq

2- Identify the appropriate environmental conditions

the growth of deciduous fruits

3- Learn about the most important ways to reproduce

4- Learn about the most important methods of prun and breeding deciduous fruits

Teaching and Learning Strategies

Strategy

- 1- Through lectures.
- 2- Direct meeting with students (conversations).
- 3- Scientific trips to different agricultural work sites.
- 4- Hosting specialized professors to increase the scientific level of students.

Course Name:

Design and analysis of experiments

Course Code:

AH1933

Semester / Year:

2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

attendance is according to the lecture schedule

Number of Credit Hours (Total) / Number of Units (Total)

70 hours / Units 3.5

Course administrator's name (mention all, if more than one name)

Name: prof.Dr. Saad A. Mahmood Email: saad.abd@uoanbar.edu.ig

Course Objectives

- 1- The ability to understand the basics of design and analysis of experiments
- 2- Increasing the skills of primary school student in using statistical designs in analyzing agriculturexperiment data
- 3- Students' ability to use these skills agricultural experiments

Teaching and Learning Strategies

- 1- Follow the lecture method and use modern presentat methods.
- 2- Direct dialogue with students by asking them question
- 3- Homework assignments (solving exercises examples).
- 4- Learning through applied designs.

Course Name:

Plant Growth Regulators

Course Code:

AH1934

Semester / Year:

Autumn / 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

It is given in the presence of the students

Number of Credit Hours (Total) / Number of Units (Total)

75 hours / 3.5 units

Course administrator's name (mention all, if more than one name)

Name: Assist. Prof. Dr. Atheer Mohammed Ismail Email: ag.atheer.mohammed@uoanabr.edu.iq

Course Objectives

Course Objectives

- 1- Introduce students to hormones and plant growth regulators, their types, and the common relationship between them in their synergistic or antagonistic effects, as well as their physiological effects that contribute to a large extent to plant growth and development
- **2** Enable students to know the terms related to plant growth regulators and their horticultural and field applications.
- **3** Recognize the relationship of growth regulators with the environmental factors surrounding the plant and their interaction with the growth stage and anatomical structure.
- **4** Recognize the biosynthetic pathways of plant hormones and the physiological effects on plant growth and development.
- **5** Field applications of plant growth regulators and their uses in the field of plant tissue culture technology.

Teaching and Learning Strategies

Strategy

- 1- Follow the lecture style with the use of modern means of presentation.
- 2- Conducting laboratory experiments.
- 3- Direct dialogue with students by asking them questions.
- 4- Homework (writing scientific reports).
- 5- Learning through applied field practices.

		Outcomes	name	method	method
The first	5 hr.	1- Lectures	Theoretical: Plant	Theoretical	Questions,
		2 - the computer	Hormones (Preface a	lectures	discussions
		3 - A modern	Terminology)	and	and examples
		mobile device	Practical: Preparation	practical	
		4- Observations and	and use of the differe	application	
		field application	concentrations of pla	laboratories a	
			growth regulators	fields.	
Second	5 hr.	1- Lectures	Theoretical: Auxins,	Theoretical	Questions,
		2- the computer	Nature of auxins,	lectures	discussions
		3 - A modern	Biosynthesis of auxin	and	and examples
		mobile device	(IAA), Auxin transpor	practical	
		4- Observations and	(IAA), Auxins inhibito	application	
		field application	Auxins mechanism of	laboratories a	
			action, Physiological	fields.	
			effects of auxins		
			Practical: Practical		
			examples of the use of		
			plant growth regulate		
			(Auxins)		
Third	5 hr.	1- Lectures	Theoretical:	Theoretical	Questions,
	3	2 - the computer	Gibberellins (GA _S),	lectures	discussions
		3 - A modern	Reasons for the	and	and examples
		mobile device	variations in the	practical	and examples
		4 - Observations and	structural formulas o	application	
		field application	gibberellins,	laboratories a	
			Sites of gibberellins	fields.	
			biosynthesis,	ricias.	
			Biosynthesis		
			of gibberellins,		
			Inhibitors		
			of gibberellins		
			biosynthesis,		
			Gibberellins transpor		
			GA _s mechanism of		
			action, Physiological		
			effects of gibberellins		
			Practical: Practical		
			examples of the use of		
			plant growth regulate		
			(Gibberellins)		
Fourth	5 hr.	1- Lectures	,	Theorotical	Questions
rourth) III.		Theoretical: Cytokinii		Questions,
		2- the computer	(CK _S), Nature of	lectures	discussions
		3 - A modern	cytokinins, Correlativ	and	and examples
		mobile device	growth phenomena,	practical	
		4 - Observations and	Biosynthesis of	application	
		field application	cytokinins, Cytokinins	iaporatories a	

Fifth	5 hr.	1- Lectures 2- the computer 3- A modern mobile device 4- Observations and field application	transport, Cytokinins mechanism of action, Physiological effects of cytokinins Practical: Conversion systems and units of measurement Exam	Theoretical lectures and practical application laboratories a fields.	Questions, discussions and examples
Sixth	5 hr.	1- Lectures 2- the computer 3- A modern mobile device 4- Observations and field application	Theoretical: Ethylene Ethylene nature, Ethylene biosynthesis Ethylene transport, Ethylene mode of action, Ethylene degradation, Ethylene degradation, Ethylene biosynthesis and action inhibitors, Ethylene a fruit ripening, Ethylene releasing compounds (ERC), Physiological effects of ethylene Practical: System of foliar application	Theoretical lectures and practical application laboratories a fields.	Questions, discussions and examples
Seventh	5 hr.	1- Lectures2- the computer3- A modern mobile device4- Observations and field application	Theoretical: Abscisc acid (ABA), Nature of ABA, Abscisc acid biosynthesis, ABA transport, ABA mechanism of action, Physiological effects abscisc acid Practical: Field applications of the foliar spray system	and practical application	Questions, discussions and examples
Eighth	5 hr.	1- Lectures2- the computer3- A modern mobile device4- Observations and field application	Theoretical: Plant growth retardants, Physiological effects oplant growth retardant Practical: Bioassays of plant growth regulators	application laboratories a fields.	Questions, discussions and examples
Ninth	5 hr.	1- Lectures	Theoretical:	Theoretical	Questions,

	2- the computer3- A modern mobile device4- Observations and field application	Brassinosteroids (BR _S Chemical characterist of BR _S , Biosynthesis of BR _S , Transport and metabolism of brassinosteroids, Physiological effects of BR _S , Interaction of brassinosteroids with other hormones Practical: The pH of the solution and its interaction with plant growth regulators	lectures and practical application laboratories fields.	discussions and examples
Tenth 5 hr.	1- Lectures2- the computer3- A modern mobile device4- Observations and field application	Exam	Theoretical lectures and practical application laboratories a fields.	Questions, discussions and examples
Eleventh 5 hr.	1- Lectures 2- the computer 3- A modern mobile device 4- Observations and field application	SA production, Conjugation and portioning of salicylic acid, Movement and transport of salic acid, Physiological effects of salicylic acid, Role SA in thermogenesis, Role of SA in pathoge defense Practical: Application on the physiological effects of plant growth regulators (Cytokinins and Ethylene)	Theoretical lectures and practical application laboratories a fields.	Questions, discussions and examples
Twelfth 5 hr.	1- Lectures 2- the computer 3- A modern mobile device	Theoretical: Jasmonic acid (JA), Jasmonic ac and plant responses, Jasmonic acid and pla	lectures and	Questions, discussions and examples

		4 - Observations and	resistance, Nature of	application	
		field application	methyl jasmonic acid (MeJA), Jasmonic acid as endogenous growt regulator, Sites and biosynthesis of JA, Ro and activity of JA, Physiological effects of jasmonic acid Practical: Application on the physiological effects of plant growth retardants	laboratories a	
Thirteenth	5 hr.	1- Lectures 2- the computer 3- A modern mobile device 4- Observations and field application	Theoretical: Polyamin (PAs), Polyamines biosynthesis, Interaction between polyamines and other plant hormone. Physiological effects opolyamines Practical: Tissue culture, micro propagation and applications of Plant growth regulators	Theoretical lectures and practical application laboratories a fields.	Questions, discussions and examples
Fourteenth	5 hr.	 1- Lectures 2- the computer 3- A modern mobile device 4- Observations and field application 	Theoretical: The interaction between plant growth regulate plant growth stage, anatomical structure and environmental factor Practical: Preparation and use of the difference concentrations of pla growth regulators	practical application laboratories	Questions, discussions and examples
Fifteenth Course Eva	5 hr.	1- Lectures2- the computer3- A modern mobile device4- Observations and field application	Exam	Theoretical lectures and practical application laboratories a fields.	Questions, discussions and examples

Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc.

Learning and Teaching Resources					
Required textbooks (curricular books, if any)	Al-Khafaji, M. A. 2014. Plant Growth Regulators, Applications and Horticultural Uses. Ministry of Higher Education and Scientific Research, University of Baghdad, College of Agriculture, Iraq.				
Main references (sources)	Davies, P. J. 2010. The plant hormones: Their nature, occurrence and functions. In: Plant Hormones: Physiology, Biochemistry and Molecular Biology, 833. Dordrecht; Boston, MA: Kluwer Academic Publishers.				
Recommended books and references (scientific journals, reports)	Halmann, M. 1990. Synthetic plant growth regulators. Advances in Agronomy, 43: 47-105.				
Electronic References, Websites					

1. Course Name:

Irrigation and puncture

2. Course Code:

AH1935

3. Semester / Year:

First Semester, 2023-2024

4. Description Preparation Date:

25/01/2024

5. Available Attendance Forms:

Attendance (theoretical + practical)

6. Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 3 units

7. Course administrator's name (mention all, if more than one name)

Prof. Dr. Shuker Mahmood Hasan smhasan@uoanbar.edu.iq

- 8. Course Objectives
- 1. Teaching UG students the basics of drainage.
- 2. Teaching UG students the problems of drainage.
- 3. Teaching UG students the design and construction of drainage networks.
- 4. Teaching UG students the concepts of floods and methods of controlling them.
 - 9. Teaching and Learning Strategies

Strategy

- 1. Traditional means of explanation and clarification.
- 2. Electronic means of explanation and clarification.
- 3. Field work.
- 4. Adopting student groups for field work to take measurements.
- 5. Show illustrative pictures of the devices and their accessories.

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject	Learning method	Evaluation method
			name		
One	5	Drainage under standable, purpose drainage, advantages of drainage drainage in Iraq		A lecture with explanation a clarification	The exam
Two	5	Physical soil properties and its rela with drainage	Irrigation and puncture	A lecture with explanation and clarification	The exam
Three	5	Water flow in soils, pioseuilles la	Irrigation and puncture	A lecture with explanation a clarification	The exam

Four		First month exam - theoretical and practical						
Five		Evaporation, transpiration, infiltrati	Irrigatio puncture	A lecture with explanation and clarification	The exam			
Six	5	Stream flow measurement	Irrigation an puncture	A lecture with explanation a clarification	The exam			
Seven	5	Water timer curves	Irrigation an puncture	A lecture with explanation and clarification	The exam			
Eight	Second month exam - theoretical and practical							
Nine	5	Floods expectations	irrigation and	A lecture with explanation and clarification	The exam			
Ten		Sub surface water and i	ts resources					
Eleven	5	Soil Water and its vertical distribution	irrigation and	A lecture with explanation and clarification	The exam			
Twelve	5	Ground water movement	Irrigation and	A lecture with explanation and clarification	The exam			
Thirteen	Third month exam - theoretical and practical							
Fourteen	General Review of the material							
Fifteen		Field Visit t	o drainage proje	ect in college	·			

11. Course Evaluation

- 1- Daily exams.
- 2- Monthly tests.
- 3- Preparing and delivering seminars.
- 4- Daily posts.
- 5- preparing the special problem.

Course Name:

Vegetable production / 2

Course Code:

AH19310

Semester / Year:

Second Semester, 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Theoretical material is given 100%.

Practical material is given 100%

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Units 3.5

Course administrator's name (mention all, if more than one name)

Name: Dr. omar hashim muslah Email: ohmosleh@uoanbar.edu.iq

Course Objectives

Course Objectives:

1 Studying the various environmental factors affecting growth and yield formation

- **2-** Learn about the methods of classifying vegetab crops.
- **3-** Knowing the appropriate soil for each of agricultural crops
- To identify the methods of cultivation production of vegetable crops belonging to various summer families
- **4-** Knowing the damages of temperature intensity of lighting to crops

Teaching and Learning Strategies

Strategy:

- 1- Follow the lecture method and use modern presentation methods.
- 2- Conduct laboratory experiments.
- 3- Direct dialogue with students by asking them questions.
- 4- Homework assignments (writing scientific reports).
- 5- Learning through applied laboratory work

Course Structure

22. Course Objectives

The beekeeping course, both practical and theoretical, aims to introduce students to bee insect, what is the economic and medical importance of raising this insect, how deal with it correctly, and what is the benefit of beekeeping.

23. Teaching and Learning Strategies

A- Knowledge and Understanding

- A1- Understand the science of beekeeping
- A2- Identify the types and breeds of honey bees
- A 3- Distinguish between the different pests that infect bees.
- A4- Knowing the economic importance of beekeeping
- A 5- Knowing the correct and modern methods of beekeeping
 - A6 Real knowledge of practical methods for managing the apiary.

24. Course Structure

and methods of	of extracting them
Teaching a	and Learning Strategies
Strategy	1- Lecture and presentation
	2- Discussion
	3- Presentation of academic problems
	4- Finding appropriate solutions 5- Brainstorming
	6- Collaborative style
	7- Study previous lectures

1. Course Name:

deciduous fruit / 2

2. Course Code:

AH19316

3. Semester / Year:

SPRING 2023-2024

4. Description Preparation Date:

25/1/2024

5. Available Attendance Forms:

IN CLASS

6. Number of Credit Hours (Total) / Number of Units (Total):

5HOURS/3.5 UNITS

7. Course administrator's name (mention all, if more than one name)

Name: Dr. Samir abd ali

8. Course Objectives

Course Objectives

Identifying the most important strategic deciduous fruit varieties growing in the conditions of Iraq

Identify the appropriate environmental conditions for the growth of deciduous fruits

Learn about the most important ways to reproduce grapes

Learn about the most important method of pruning and breeding deciduous fruit

9. Teaching and Learning Strategies

Strategy

Teaching the rolotical parts in class by using data show and some new methods, Teaching the practical part through field visits/work in the department's laboratories

10. Course Structure

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

Course Name:

Plant Tissue Culture

Course Code:

AH1940

Semester / Year:

First Semester, 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Theoretical material is given 100%.

Practical material is given 100%

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Units 3.5

13. Course administrator's name (mention all, if more than one name)

Name: Dr. Yasir Sayel Sekhi

Email: yassirsayel@uoanbar.edu.iq

14.Course Objectives

Course Objectives:

1- Its use in the field of plant breeding, improvement and conservation

Genetic sources

- 2- Rapid multiplication of plants.
- 3- Production of secondary compounds and medical drugs.
- 4- Producing virus-free plants

15. Teaching and Learning Strategies

Strategy:

- 1- Follow the lecture method and use modern presentatio methods.
- 2- Conduct laboratory experiments.
- 3- Direct dialogue with students by asking them questions
- 4- Homework assignments (writing scientific reports).
- 5- Learning through applied laboratory work

Course Name:

Evergreen Fruits

Course Code:

AH1941

Semester / Year:

Autumn Semester, 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Theoretical and practical lectures according to the weekly schedule Field application for the practical aspect

Field visits

Number of Credit Hours (Total) / Number of Units (Total)

30 hours /3.5 unit

Course administrator's name (mention all, if more than one name)

Name: Prof.Dr.Thamer Hameed Reja

Email: ag.thamer.hameed@uoanbar.edu.iq

Course Objectives

Course Objectives

A- Introducing the importance of sustainable fruit types, methods of propagating and caring for them, and the possibility of expanding their cultivation.

- B- Paying attention to the productivity and development of evergreen fruit cultivation.
- C- Knowing the climatic environment for each type of fruit and ways to adapt to the climate in Iraq.
- D- Paying attention to how to establish evergreen orchards and the dimensions of cultivation for each type, while identifying the water and fertilizer needs of each type of evergreen fruit.

Teaching and Learning Strategies

Strategy

- 1. Preparing presentations that explain the basic concepts in the field of horticulture and providing detailed lectures on various topics. Use pictures and illustrations to better illustrate ideas and concepts.
- 2. Organize interactive sessions and workshops that allow participants to actively participate in the learning process. Practical models of growing and establishing sustainable orchids are presented, and participants are encouraged to participate and actually apply.
- 3. Organize field trips to government orchards, nurseries and local farms. Explain how to care and maintain it.
- 4. Using multimedia, mobile applications, and educational programs to provide information and interact with students

Course Structure							
Week	Hou	Required Learning	Unit or subject	Learning	Evaluation		
	rs	Outcomes	name	method	method		
First weel	5	Identify the climatic zones and climatic needs of different fruits	importance of evergreen fruit trees, and identify the climatic division of fruit trees	Theoretical lectures and field and laboratory applications	Questions, discussions and examples		
Second week	5	Identify the citrus genus and the divisions of each genus according to the species it contains.	Possibility of identifying the phenotypic characteristics of different citrus species	Theoretical lectures and field and laboratory applications	Questions, discussions and examples		
Third wee	5	The ability to identify the phenotypic characteristics of different citrus species and hybrids resulting from crossbreeding between different species	Identify the citrus genera and the divisions of each genus according to the species they contain, in addition to the hybrids resulting from crossbreeding between these	Theoretical lectures and field and laboratory applications	Questions, discussions and examples		
Fourth wed	5	The ability to distinguish different varieties, of course, by their vegetative system	Botanical description, nutritional value, climatic conditions, plant divisions, and internal and external factors affecting the growth of citrus trees.	Theoretical lectures and field and laboratory applications	Questions, discussions and examples		
Fifth wee	5	Identify the climatic factors such as high and low temperatures, the negative damages resulting from them, and ways to protect	Climatic factors affecting citrus trees, methods of protection from temperature damage, and methods of	Theoretical lectures and field and laboratory applications	Questions, discussions and examples		

		them	propagation.		
Sixth wee	5	Diagnosing citrus rootstocks suitable for grafting	Citrus origins, crop service operations, pests and diseases that affect citrus trees.	Theoretical lectures and field and laboratory applications	Questions, discussions and examples
Seventh week	5	Identifying the areas of olive propagation, the environment suitable for the propagation of olive trees, and the biology of flowers and fruits.	habitat, spread, the appropriate environment for the	Theoretical lectures and field and laboratory applications	Questions, discussions and examples
Eighth wee	5	Identify the types of soil suitable for olive cultivation and the propagation methods used	Specifications of the soil in which olive trees are grown and the propagation methods used.	Theoretical lectures and field and laboratory applications	Questions, discussions and examples
Ninth week	5	Diagnosing the most important problems due to the lack of spread of olive cultivation in Iraq	Obstacles to olive tree cultivation, crop service, pollination, and knotting operations.	Theoretical lectures and field and laboratory applications	Questions, discussions and examples
Tenth wee	5	Getting to know the original place of banana cultivation and the most important service operations	Bananas, original habitat, types, suitable environment for agriculture, agricultural operations in banana fields	Theoretical lectures and field and laboratory applications	Questions, discussions and examples
Eleventh we	5	The possibility of identifying the pineapple fruit, its place of spread, and the conditions affecting it	Pineapple, original habitat, suitable environment, climation conditions, pollination and contraction, and methods of	Theoretical lectures and field and laboratory applications	Questions, discussions and examples

			reproduction		
Twelveth week	5	Diagnosing and knowing the original habitat of the mango, contract conditions, pollination, and contract problems	Mango, original habitat, botanical description, environmental conditions, flowering, knotting, pollination and knotting problems.	Theoretical lectures and field and laboratory applications	Questions, discussions and examples
Thirteenth week	5	Diagnosing and knowing the original habitat of the mango, contract conditions, pollination, and contract problems	Mango, original habitat, botanical description, environmental conditions, flowering, knotting, pollination and knotting problems	Theoretical lectures and field and laboratory applications	Questions, discussions and examples
Fourteent h week	5	Identifying the Sidr fruit and the conditions affecting its growth	Sidr, original habitat, botanical description, and methods of propagation.	Theoretical lectures and field and laboratory applications	Questions, discussions and examples
Fifteenth week	5	An exam, and a visit to one of the evergreen fruit orchards and propagation nurseries.	An exam, and a visit to one of the evergreen fruit orchards and propagation nurseries	Theoretical lectures and field and laboratory applications	Questions, discussions and examples
_					

- 1- Monthly written exams.
- 2- Direct oral exams and field work in the college's fields.

Course Name:

Landscape Engineering

Course Code:

AH1944

Semester / Year:

Autumn(First) / 2023-2024

Description Preparation Date:

25-01-2024

Available Attendance Forms:

Theoretical subject: It is given through the lecture program

Practical subject: practical application

Field visits

Summer Training

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Theoretical

45 hours / practical

Total 75 hours

Course administrator's name (mention all, if more than one name)

Assent. Prof. Dr. Zeyad Mohammed Abdulrazzaq

zeyadmohammed@uoanbar.eud.iq

Course Objectives

Knowledge of garden design concepts, its elements, and the principles and rules followed in the design

Levels and systems of design according to international and local planning standards.

Factors affecting design and the stages followed in garden design and the importance of each stage in detail.

Landscaping systems and their types from private gardens to parks outside cities and green belts.

Knowledge of international, Arab and local garden design standards

Knowledge of the design programs used in developing design proposals and training on one of these programs

Teaching and Learning Strategies

Brainstorming

Thinking strategy according to the student's ability

Critical Thinking is a term that symbolizes the highest level of thinking that aims to pose an issue and then analyze it logically to reach the required solution.

Strategies of presentation, coordination, training, discussion, talking, listening, writing, reading, reading, thinking and reflecting

Cognitive strategies, which are concerned with analyzing the topics to be studied, including naming, explaining, detailing, and organizing.

Metacognitive strategies, which are concerned with managing the learning process, such as

selective attention to a specific topic or part of it, monitoring understanding, controlling comprehension, and conducting self-evaluation of what has been learned.

Social or affective strategies that are concerned with students' interaction with the teacher on the one hand and students' interaction with each other on the other hand, such as discussion and dialog with oneself.

These strategies can be achieved through:

Adopting the method of giving theoretical lectures using various modern means of explanation, through which the design systems used in the past and present are recognized in terms of the pros and cons of each design and how to overcome the negatives.

Following the method of practical application through which it aims to:

Introduce the student to how to start designing gardens according to the scientific stages.

The student knows the basic requirements in the garden design process

The student knows how to select and analyze design sites and develop appropriate design proposals for each proposed site, whether private or public gardens or green belts.

Recognize the design programs used to develop proposed designs.

Creating different designs for gardens after selecting different sites, and this is done on A3 paper and then applied on the ground or making miniature models of the proposed designs

Opening the door for discussion to exchange ideas with students, as well as applying the question and answer strategy.

Assigning students homework, writing reports and studies, and conducting field visits. Conducting daily and monthly theoretical and practical tests.

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
The first	5	An introduction to landscape design with an explanation of the concepts and terminology used within the discipline	Landscape Engineering	Explain, present the lecture and conduct the scientific application to frame the A3 canvas space while recognizing the components of the map, symbols and terminology of the garden.	Discuss, ask questions, give examples, and quiz students

Second	5	Levels of Open Space Design	Landscape Engineering	Explain, present the lecture and conduct the scientific application to recognize the different botanical and structural symbols and how to draw them on the drawing board.	Discuss, ask questions, give examples, and quiz students
Third	5	The stages of open space design, which are four stages	Landscape Engineering	Explain, present the lecture and conduct the scientific application of how to draw symbols and geometric shapes in the drawing board and apply them on the ground.	Discuss, ask questions, give examples, and quiz students
Fourth	5	Planningcriteria for open spaces	Landscape Engineering	Explain, present the lecture and conduct the scientific application of drawing curvedlines in the drawing board and applying them on the ground.	Discuss, ask questions, give examples, and quiz students
Fifth	5	Rules and principles of open space design	Landscape Engineering	Explain and present the lecture and conduct the scientific application of a typicalhome	Discuss, ask questions, give examples, and quiz students

Course Name:

Farm management

Course Code:

AH1945

Semester / Year:

First semester, 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

regularity (attendance)

Number of Credit Hours (Total) / Number of Units (Total)

75 Hour / 3.5 unit

Course administrator's name (mention all, if more than one name)

Name: Eyid Abbas Abdalltef

Email: ag.eyid.abbas@uoanbar.edu.iq

Course Objectives

Course Objectives

- A Providing the student with the concept of the basic principles of farm management and the economic principles related to them.
- B Introducing the student to the most important economic activities and functions required by farm management.
- C Introducing the most important types of farms and ways to manage them.
- D Introducing the economic criteria and foundations that the farmer adopts in his production.
- E Introducing the student to the econor controls to achieve the objectives of the farm

Teaching and Learning Strategies

Strategy

Course Name:

Palm Production

Course Code:

AH19411

Semester / Year:

Fourth stage / Spring Semester 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Theoretical and practical lectures according to the weekly schedule

Field application for the practical aspect

Field visits

Number of Credit Hours (Total) / Number of Units (Total)

30 hours /3.5 unit

Course administrator's name (mention all, if more than one name)

Name: Prof.Dr.Thamer Hameed Reja

Email: ag.thamer.hameed@uoanbar.edu.iq

Course Objectives

Course Objectives

- 1.Introducing the importance of the date palm, improving its growth, and methods of propagation and processing of the fruits
- 2. Paying attention to the productivity, development and sustainability of palm groves.
- 3. Knowledge of the climatic environment and the appropriate thermal units for each type of palm tree
- 4. Knowing ways to distinguish between palm varieties through the morphological and structural characteristics of the date palm....

Teaching and Learning Strategies

Strategy

- 1. Preparing presentations that explain the basic concepts in the field of horticulture and providing detailed lectures on various topics. Use pictures and illustrations to better illustrate ideas and concepts.
- 2. Organize interactive sessions and workshops that allow participants to actively participate in the learning process. Practical models for growing vegetable plants, orchids or designing and landscaping gardens are presented, and participants are encouraged to participate and apply them in practice.
- 3. Organize field trips to local parks, gardens, nurseries and farms. Explain how to care and maintain it.
- 4. Using multimedia, mobile applications, and educational programs to provide information and interact with students.

Course Structure

Week Hours Required Unit or subject Learning method Evaluation method

riist week	5	The student will be able to learn about the original habitat of the date palm and the origin of the	History of the emergence of the date palm, with morphological description, and	Botanical classification of the date palm, and important date palm genera from	Questions, discussions and examples
		date palm	nutritional importance.	an economic standpoint.	
Second week		The student will be able to identify the thermal units of early, medium and late varieties and the suitability of an area for palm cultivation	Environmental factors suitable for the success of the date palm, thermal units, a visit to palm orchards	Morphological description of the vegetative parts of the date palm.	Questions, discussions and examples
Third week		Learn about the general description of the date palm and the genera of date palms	The morphological and structural characteristics of the date palm, the general description of the date palm seed, the structure of the seed	Visit the palm grove and learn about some of the cultivated varieties.	Questions, discussions and examples
Fourth week		Learn about the anatomical structure of leaves and how fronds and their parts grow and develop	Formation of leaves and fronds, anatomical structure of the leaf, anatomical structure of the head of the palm, and development of fronds	The anatomical structure of the date palm head and the development of the fronds, stem, roots and branches that occur in the date palm	Questions, discussions and examples

Fifth week	5	Identify the types of flower inflorescences, their differentiation, root structure, and the nature of its growth	Differentiation of inflorescences, roots, root growth, anatomical structure of the date palm fruit	The anatomical structure of the date palm head and the development of the fronds, stem, roots and branches that occur in the date palm	Questions, discussions and examples
Sixth week		Identify the differentiation of floral inflorescences, roots, root growth, and the anatomical structure of the date palm fruit	the differentiation of floral inflorescences, roots, root growth, and the anatomical structure of the date palm fruit	Distinctive characteristics of the nature of root formation in the date palm, the anatomical structure of the roots of the date palm	Questions, discussions and examples
Seventh week		Learn about the types of insemination and how to perform the insemination and fertilization process	Flowering, pollination, fertilization and establishment of the date palm, the formation and appearance of the inflorescence, the timing of pollination, the effect of the source of the pollen,	Flowering, pollination, fertilization and establishment of the date palm, the formation and appearance	Questions, discussions and examples
Eighth week		Method of propagation, how to distinguish between seed palms and cuttings, reasons for failure, and how to plant and succeed the cuttings	Methods of palm reproduction, seeds, vegetative method, cuttings separation, morphological description of the inflorescence and its parts in the date palm.	The process of planting offshoots and rooting shoots	Questions, discussions and examples

Ninth week	Method of propagation, how to distinguish between seed palms and cuttings, reasons for failure, and how to plant and succeed the offshoots	Methods of palm reproduction, seeds, vegetative method, offshoots separation, morphological description of the inflorescence and its parts in the date palm	Morphological description of the inflorescence and its parts in the date palm, structure and characteristics of female and male flowers, characteristics of pollen and male flowers, characteristics of pollen and female flowers, emergence and development of flower buds.	Questions, discussions and examples
Tenth week	Learn about irrigation techniques, adding fertilizers, and application times	Service operations, irrigation, fertilization, the effect of temperature and humidity, breeding and pruning, methods of thinning, concentration and thinning.	Morphological description of the inflorescence and its parts in the date palm, structure and characteristics of female and male flowers, characteristics of pollen and male flowers, characteristics of pollen and female flowers, emergence and development of flower buds	and examples
Eleventh week	(Second month exam) Service operations, irrigation, fertilization, the effect of temperature and humidity, breeding and oruning, methods of thinning,	•	palm pollen, the effect of temperature and humidity on pollen germination, examining the	Questions, discussions and examples

Course Name:

Biotechnology

Course Code:

AH19412

Semester / Year:

Second Semester, 2023-2024

Description Preparation Date:

25 / 1/ 2024

Available Attendance Forms:

Theoretical material is given 65%.

Practical material is given 35%

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Units 3.5

Course administrator's name (mention all, if more than one name)

Name: Dr. Idrees Hussein Mola Salih Email: idresshussein@uoanbar.edu.iq

Course Objectives

Course Objectives:

- The student gets to know biotechnology and it importance in terms of application.

-Knowing the theoretical principles and basics related to the scientific material, the genetic material (DNA).

- Complete understanding of how DNA and RNA replicate.
- The student will know how proteins are formed
- The student will learn about the methods of ge transfer into cells.

Teaching and Learning Strategies

Strategy:

- 1- Follow the lecture method and use modern presentatio methods.
- 2- Conduct laboratory experiments.
- 3- Direct dialogue with students by asking them questions
- 4- Homework assignments (writing scientific reports).
- 5- Learning through applied laboratory work

Course Name:

Harvesting and storing horticulture crops

Course Code:

AH19413

Semester / Year:

Semester / 4th stage/ 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Presence in the college according to lectur's secdule

Number of Credit Hours (Total) / Number of Units (Total)

30 hours / Units 3.5

Course administrator's name (mention all, if more than one name)

Name: Ass.prof.Dr. Ali Ammar Ismaeel

Email: ali.ammar@uoanbar.edu.iq

Course Objectives

Iden ifying the most important strategic of storage of horticultural crops in the conditions of Iraq

Stud ring the importance of lost of weight during storage

studying the fruit ripening and relationship with plant hormones

studying the artificial ripening of fruits before and after harvest

studying the respiration of fruits and ethylene production

studying the chemical ingredient and Nutritional value of fruits and relationship with storage period

studying the harvesting, sorting, grading, packaging and storage ways of horticultural crops

studing the diseases that affect the horticultural crops during cold storage

stud ring the technique of flower storage

Teaching and Learning Strategies

Strategy:

- 1- Follow the lecture method and use modern presentation methods.
- 2- Conduct laboratory experiments.
- 3- Direct dialogue with students by asking them questions.
- 4- Homework assignments (writing scientific reports).
- 5- Learning through applied laboratory work
- 6- visiting the cold stores
- 7- student do differential experiments about storage of varies vegetables and fruits

Course Name:

Soil fertility and fertilizers

Course Code:

AH19414

Semester / Year:

Second Semester, 2023-2024

Description Preparation Date:

25/1/2024

Available Attendance Forms:

Attendance (theoretical + practical)

Number of Credit Hours (Total) / Number of Units (Total)

65 hours / 3.5 units

Course administrator's name (mention all, if more than one name)

Name: Bassam Ramadhnan Sarheed

Email: ag.bassam.ramadhn@uoanbar.edu.iq

Course Objectives

- 1. Understanding the principles of soil fertility and know 4. Knowing how much, when and h the extent of the plant's need for various nutrients and to add these nutrients and in w relationship to plant productivity.
- 2. The extent of the importance of plant nutrients, forms in which they are found, and the factors affect and cost of added fertilizers, along w their readiness for the plant.
- 3. Assessing the fertility state of the soil and identifying symptoms of deficiency of various nutrients that appear without affecting the yield. the plant.
- form (chemical or organic).
- 5. Calculating the economic feasibi raising awareness about reducing amount of these fertilizers add

Teaching and Learning Strategies

Strategy

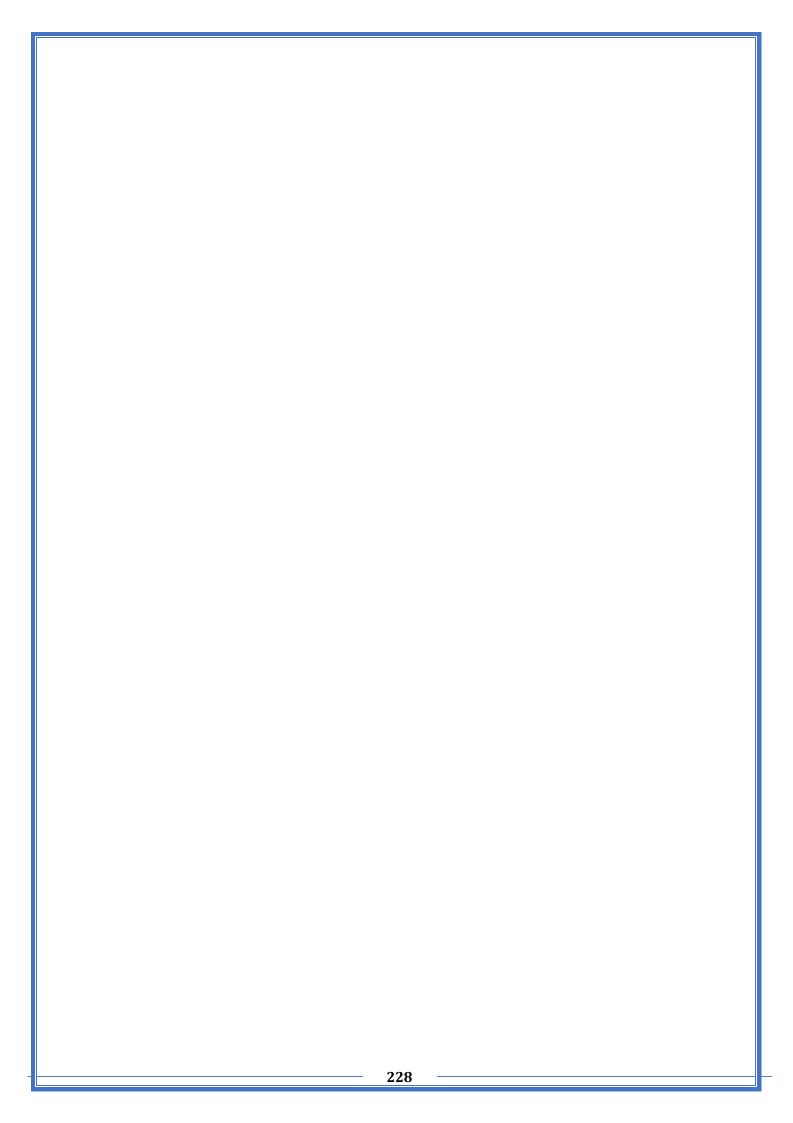

- 1. Traditional means of explanation and clarification.
- 2. Electronic means of explanation and clarification.
- 3. Field experiments.
- 4. Field visits to agricultural fields.
- 5. Adopting student groups to conduct separate field experiments.
- 6. Use of various laboratory devices and equipment.
- 7. Displaying illustrative pictures of the various manifestations of symptoms of element deficiency on plants.

Course Objectives

- 9. Teaching and Learning Strategies
 - a. Developing teaching programs in coordination with higher department
 - b. Develop teaching curricula similar to the work environment.
 - c. Sending students to departments and directorates for the purpose of conducting summer application.
 - d. Assigning students to conduct research and reports.
 - e. Assigning students to go to the library and collect resources on the topi
 - f. Implementing practical lessons in laboratories, each according to specialty

11. Course Evaluation

- a. Daily and monthly tests through questions on the subject of the subject
- b. Grades on students' participation in research and scientific reports
- c. Discussing research and reports, presenting them, and giving them a grade
- d. Conducting tests during the application period and asking questions to students to determine the extent of their understanding of the subject
- e. Conduct a discussion of reports at the end of the semester to find out students' choices in courses
- f. Writing reports after completing the application period to determine the extent to which students were able to diagnose problems and how to find solutions

Seminars				
2. Course Code:				
AH19417				
3. Semester / Year:				
SPRING 2023-2024				
4. Description Preparation Date	:			
25/01/2024				
5. Available Attendance Forms:				
IN CLASS				
6. Number of Credit Hours (Total) / Number of Units (Total):			
15 Hours / 1 Units				
	e (mention all, if more than one name)			
Assistant Professor: Yasir Say	rel Sekhi			
8. Course Objectives				
Course Objectives				
1. Expanding knowledge and developing skills in the field of academic specialization.				
2. Enabling students to acquire more in-depth and detailed knowledge about the specific topic.				
3. Focus on specialized topics in the field chosen by the student.				
4. Giving students an opportunity to search for information in research through scientific websites and				
9. Teaching and Learning Strategies				
-	al part/classroom using electronic projectors.			
10. Course Structure				
11. Course Evaluation				
The student discusses the topic he presented in a scientific manner and discusses all its aspects.				
12. Learning and Teaching Resources				
Required textbooks (curricular books, if any	Nothing			
Main references (sources)	Relying on scientific journals and published research horticultural specialties			
Recommended books and references				
(scientific journals, reports)
