Problem / Solution Paragraphs

In this unit you will learn about...

- Write about problems and solutions
- Use real conditionals
- Write a two- paragraph text with linking phrases

1. **Problems / solutions** writing first explains a problem and then proposes one or more solutions to that problem. Often this type of writing requires more than one paragraph. In this unit, you will write a two- paragraph discussion of a problem and solution. A problem paragraph describes and discusses a

problem issue. The topic sentence names the issue you will discuss. The supporting sentences show why this issue is a problem.

2. Using conditional structures :

The first conditional is a useful way to talk about problems and solutions.

Fish will get ill if factories dump their waste into streams.

3. Linking problems with solutions:

In order to solve these problems,

In order to overcome these problems,...

To meet this need, ...

One solution is....

One answer is...

4. Finding the best solution:

After you brainstormed solutions to your problem, you need to select the best one or ones to write about in your solution paragraph. A strong solution clearly and reasonably solves the problem. A weak solution doesn't really solve the problem or isn't practical or not logical.
